

**ACCESSORI SERVICE S.r.l.** is a company specialized in the production of high-quality accessories for footwear, leather goods, clothing, and cosmetics.

To this end, the company has adopted a Quality and Environmental Policy based on the following principles:

- Ensuring full compliance with all applicable European, national, and local regulations governing products (alloy accessories), environmental protection, and any other subscribed requirements.
- Promoting the Quality and Environmental Policy at all levels of the organization (employees, suppliers, and customers) to ensure awareness, understanding, and daily application.
- Preventing, controlling, and minimizing impacts related to production, business continuity, and the environment associated with company activities, with particular attention to the most significant aspects, by implementing preventive actions and continuously monitoring critical parameters.
- Meeting the needs and expectations of interested parties in terms of product quality, services provided, and environmental aspects.
- Ensuring preparedness and effective response capability in case of emergencies.
- Maintaining constant focus throughout the organization on continuous improvement, understood as a process of growth in resources and process performance.
- Working with qualified suppliers.

Based on the above, objectives and targets will be established annually to achieve continuous improvement, reduce environmental impacts, and enhance process performance while consistently guaranteeing high production quality. ACCESSORI SERVICE S.r.l. is committed to translating the Quality and Environmental Policy into operational decisions according to the following principles, responsibilities, and functions:

1. Continuous improvement of the plant's production and environmental performance by adopting operational methods or plant upgrades aimed at preventing, containing, and reducing impacts related to production, business continuity, and the environment generated by company activities, such as the use of advanced software for 3D design, online platforms for brochure consultation without paper presentations, CNC machining centers, and highly efficient die-casting machinery.
2. Adopting measures to contain significant environmental impacts, with particular attention to:
  - atmospheric emissions in compliance with current legislation;
  - waste management in compliance with current legislation and maximizing waste recycling.
3. Recovering production waste through re-melting and reintroduction into the production process.
4. Applying management procedures or implementing technical improvement measures to reduce risks related to production, business continuity risks, and potential environmental emergencies.
5. All personnel provide a fundamental and aware contribution to the management of the Quality and Environmental Management System. Therefore, ACCESSORI SERVICE S.r.l. systematically promotes information and training activities for all employees, with the aim of increasing awareness of the significant impacts arising from their activities and the benefits to Quality and the Environment resulting from improved individual performance, as

well as the potential consequences of deviations from operating procedures and the requirements of the Quality and Environmental Management System.

6. Ensuring maximum communication, transparency, and awareness toward suppliers and customers regarding Quality and Environmental matters in order to obtain and strengthen trust in the company's activities.
7. Maintaining an active Improvement Objectives Plan in order to ensure the protection of production, environmental, and energy-related aspects.
