The three-piece glass system eliminates the need for any plastic/metal cups aiding the environmental benefit to St. Killians

The outer glass is secured on the stand. The middle glass acts as a barrier to protect the color glass from any excess wax. The candle itself sits in the inner glass and burns for 60-90 minutes. Once it comes to the end of its life it falls through a hole at the bottom of the glass, extinguishing itself on the way down, falling into a water bath to guarantee quenching.

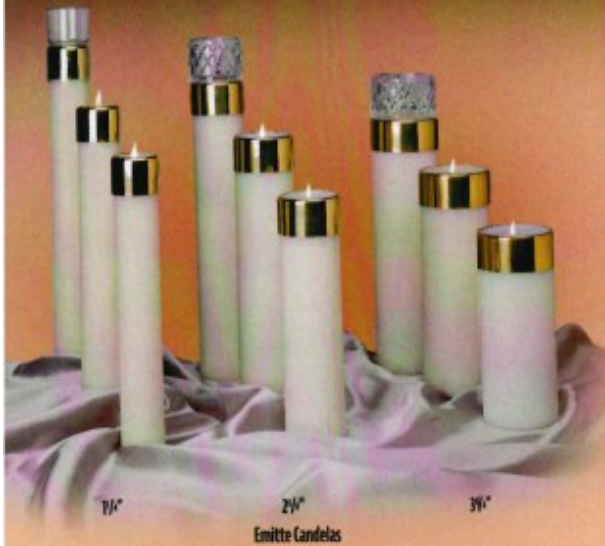

The candle is made from 3 times refined paraffin and therefore does not emit any soot or smoke; protecting the churches features and artifacts from damage.

Lifetime guarantee with every unit. Full repair/replacement of spare parts.
