

Neurologists

If you have Parkinson's Disease, finding a doctor who specializes in movement disorders can transform your journey. The Michael J. Fox Foundation emphasizes that a Movement Disorder Specialist (MDS) is a neurologist with exceptional training in this area. These experts not only excel in treating movement disorders, but they're also on the cutting edge of the latest treatments, medications and clinical trials. Remember, your Movement Disorder Specialist is an essential part of your care team, so choose someone who makes you feel at ease and truly listens to your concerns.

At Parkinson's OC, we're excited to provide this list of physicians as a valuable resource. Please note that we do not endorse any specific doctor or health care provider.
