

# Ozark Foothills Industrial Medicine Clinic

## **FMCSA Drug and Alcohol Clearinghouse** **Federally Mandated Law in 49 CFR §382.701, Subpart B**

The Clearinghouse is a database containing records of drug and alcohol violations that will include positive drug and alcohol testing results.

Let us handle your Clearinghouse solutions. Employers who do not comply with Clearinghouse requirements are subject to stiff penalties. Ozark Foothills Industrial Medicine will help you take care of the following tasks and keep you compliant:

1. Assistance with registration
2. Managing new hire queries/consents
3. Annual queries of all existing drivers
4. Reporting violations
5. Record keeping

Employers may designate a C/TPA or C/TPAs to conduct queries and/or report violations on their behalf. The C/TPA must be registered in the Clearinghouse before an employer can select the C/TPA, and C/TPAs must be designated by the employer before reporting drug and alcohol program violations or querying the Clearinghouse on their behalf.

An owner-operator (an employer that employs himself or herself as a commercial driver's license (CDL) driver, typically a single-driver operation) must designate their C/TPA(s) as part of their Clearinghouse registration process.

Pricing is available on page 2 of this packet. Clearinghouse packets are available with registration.
