Steel Casket Guide

## Steel Casket Selection

Metal caskets can be made from base steel of various gauge thicknesses, stainless steel or precious metals. In fact, copper and bronze are renowned for their timeless beauty and elegance. Most metal caskets are referred to as "corrosion resistant", "protective" or "sealed" caskets. They are assembled with a thick rubber strip along the entire length of the lid, thus creating a sealed enclosure preventing outside elements from penetrating the casket.

When it comes to metal caskets, you can pick and choose a unique look by combining features such as colours, finishes and customization options.

Lined in White Crepe  
Coordinated Metal Hardware

\$3,930

*Murphy Funeral Home & Chapel Ltd.*

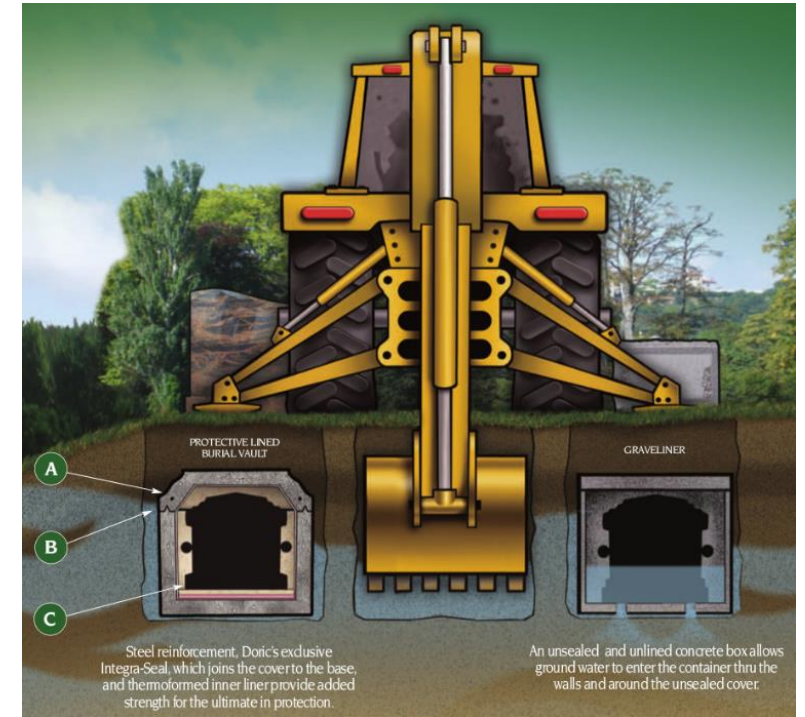

## Outer Burial Containers / Concrete Vaults

### Why choose an Outer Burial Container?

In most areas of the country, provincial or local law does not require that you purchase a container to surround the casket in the grave. However, many cemeteries as part of their by-laws may require you to have such a container. Either a grave liner or burial vault will satisfy these requirements.

Operating a modern cemetery requires heavy equipment such as backhoes and tractors. A strong durable vault provides greater protection from the weight of the equipment as well as the elements of the earth.
