RE: JGA Roofing Performance Evaluation

Mr. Narup,

JGA Roofing is currently working on a project that I'm overseeing in Goldthwaite, TX. The project we are working on is the construction of a new high school and select renovations to a portion of the existing building (admin offices, gymnasium, kitchen and cafeteria). The renovation scope of the project includes the removal and replacement of existing built up roof, sealing of unused skylights and roof penetrations, installation of a mechanically fastened TPO membrane roof, flashing roof curbs, metal flashing and trim out of copings and curbs, and downspouts. In addition to the renovations, a section of the new construction receives the same roof system and contains roof top HVAC equipment and other penetrations to flash and trim out.

JGA Roofing is over 60% complete with this scope and they have proven to be very reliable and perform work with excellent quality. JGA was very involved in voluntarily presenting money saving options for the Owner that did not jeopardize function or quality of the system. These VE options were eventually accepted by the Owner and implemented into design.

Communication is a strength of this group and seems to be consistent with the management group along with the field managers. Project changes, coordination, Owner/Arch questions were responded to with very quick turnaround.

Imperial Construction, Inc. has been very satisfied with bringing JGA Roofing on board with this construction team and would not hesitate to work with them again.

Sincerely,

A handwritten signature in blue ink, appearing to read "M. Even", is written over a light blue rectangular background.
