

March 13, 2019

We installed the DURO-LAST roofing system at our 12,000 s.f. restaurant

In Austin, Texas.

Jose, Clint and the entire team at JGA Roofing Systems were a pleasure to work with. They completed the roof in a timely manner and the quality of work was outstanding.

In addition, they were there after the initial installation to help in sealing the roof after we had new HVAC and other rooftop installations. They came back out on our install days and re-sealed around our new rooftop equipment.

If you would like to see our roof please contact me via email address below.
