To Whom It May Concern,

It is with great pleasure that I recommend JGA Roofing Systems for work on your roofing projects. JGA recently completed a roof overlay project at our school, and we were very satisfied with the job they did, and our experience with them.

The entire crew was not only respectful of school being in session while they worked, but were accommodating to our scheduling needs during school-wide testing, when we could not have noise coming from outside or on the roof. We appreciated that they rearranged their work schedule to meet our needs, exhibited professionalism, and maintained clear channels of communication throughout the project.

As a school, we prioritize safety at all times, and we were glad to discover that JGA does the same. The crew was very respectful of student space, cleaned up after themselves, and ensured high-traffic areas were clear at all times.

If you have any questions regarding JGA Roofing System's work for Seashore Middle Academy, please contact me at: 361-654-1134.

Sincerely,

Perry Pollino
Maintenance Director
Seashore Middle Academy
