III. THE FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.

1. At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
2. Horses and Athletes must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
3. Events must not prejudice horse welfare. This involves paying careful attention to the competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
4. Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, euthanasia and retirement.
5. The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.

The Long version of this Code can be obtained from the Fédération Equestre Internationale, HM King Hussein I Building, Chemin de la Joliette 8, 1006 Lausanne, Switzerland. Telephone: +41 21 310 47 47. The Code is available in English. The Code is also available on the FEI's website: <https://inside.fei.org/fei/regulations/general-rules>.

Scientific study on performance of elite Eventing horses competing in international competition conditions with the support of the FEI Eventing Committee / Risk Management Steering Group

The Swiss company Alogo Analysis (www.alogo.io) will be carrying out a scientific study on performance of elite Eventing horses competing in international competition conditions with the support of the FEI Eventing Committee / Risk Management Steering Group.

The study is focused on biomechanical and cardiovascular variables. The aim is to collect data on horse's movement, trajectory, strides, speed, intensity and energy consumption, cardiovascular load, cadence, etc. by using the Alogo Move Pro sensor to be fixed under the girth. The objective is to collect such important data to help correlate the jump profile (type of obstacle, flowers, ground level, etc.) with the actual jump trajectory of a horse and its parameters (output power intensity and frequency, speed, stride length before and after, energy consumed, etc.). It will allow to understand how it affects the horses' jump in order to help prevent injuries in the sport. Correlating this data with the heart rate for determining cardiovascular load at peak power intensity areas on the course and comparison between the CCI5*-L and CCI4*-S results will be ground breaking and enormously valuable as we strive to develop better methods of ensuring horse and athlete physiological welfare.

Such data will contribute to the study started in 2021 during the European Championship in Avenches (SUI), Montelibretti events in 2022 and at the World Eventing Championships in Pratoni del Vivaro (ITA), aiming to correlate the changes in stride and locomotion patterns in order to identify fatigue of the horse during cross-country. To date, the Alogo "Move Pro" device has been used on 138 horses from 13 National Federations at these events.

The CCI5*-L / CCI4*-S Lexington Kentucky competitions offer the opportunity of evaluating relative Cross Country course intensity between the CCI5*-L and the CCI4*-S on the same day with similar conditions and much of the same terrain.

The FEI Eventing Committee / Risk Management Steering Group fully supports the study and invite any National Federations to include their participating horses in this study, as we need the numbers to obtain significant results. Should you agree to be part of this study, could you please inform your participating Athletes, Veterinarian(s) and Chefs d'Equipe(s) to Nathalie Desscan, Manager, Eventing Risk Management (Nathalie.Desscan@fei.org).

Each athlete will be able to access the data collected through the Alogo web app or mobile app and can provide access or share the data with their NF. The data used for the study will be anonymised to ensure it cannot be related to a specific athlete/horse. NFs will receive a preliminary report of their respective horses entered in the study and the full paper of the study will be shared once the official publication will be issued.

The participation to the study is on a voluntary basis. Each rider will be responsible for its own results and Alogo Analysis SA is not responsible for the results obtained by the athletes. The contact person from the Alogo team is Mr David Deillon, he will be available by telephone +41 79 364 82 99, and/or email david@alogo-analysis.ch

XV. ANNEXES

1. STEWARDING

If an athlete is uncertain as to whether the boots he/she intends to use during an event are allowed, he/she or his/her representative should show the boots to the Chief Steward for his/her opinion before the boots are used in training or in competition.

In addition, athletes are to be made aware that hind boots must be removed and placed again on the horse's legs in the presence of a Steward while in the warm-up arena prior to entering the competition arena for certain competitions. (If bandages are used in place of boots, athletes are not required to remove the bandages in the warm-up arena.) This procedure is compulsory for competitions for which boot and bandage control is mandatory, that is the Nations Cup, Championships, and the competition with the highest prize money, and is at the discretion of the Chief Steward for other competitions.

As an alternative to carrying out this procedure at the time designated by the Steward an athlete may ask his/her groom to take the boots to the in-gate and place them on the horse's legs in front of the Steward prior to the combination entering the arena.

The Steward has the authority to intervene if a boot is deemed excessively tight by instructing that the boot be removed and put on again correctly. [Stewards are to note that it is normal for a horse's gait to be somewhat affected immediately after boots have been removed and re-placed.] If an athlete or his/her groom refuses to remove and re-place the boot(s) when instructed to do so by the Steward, a Yellow Warning Card will be issued to the athlete in question.

If it is deemed impossible or unsafe to remove the hind boots in the warm-up arena prior to the combination entering the competition arena, due to an extremely excited or nervous horse, the boots of the horse in question are to be removed by the athlete/groom following the athlete's round upon leaving the arena and inspected by the Steward. This inspection may be carried out during the boot and bandage control if the boot and bandage control is carried out for the competition in question.

This procedure does not replace boot and bandage control after completion of an athlete's round for competitions for which boot and bandage control is mandatory (refer to JRs Art. 244.1)
