

Healthy H2O Systems

Natural Neutralizer

Calcium Carbonate, is a simple and effective low pH solution. The "Natural Neutralizer" by Healthy H2O Water offers high flow rates and low pressure drop. The tank is a fiber reinforced for superior strength and durability and is non corrosive and UV resistant. It is equipped with a Clack valve that will provide years of trouble free back-flush cycles. Calcium carbonate is adequate for most applications. Magnesium Oxide can be blended in when additional neutralizing is required. After treatment the water will typically increase by one grain of hardness and raise the PH 1 to 1.5 points. The "natural" tank allows for simpler maintenance . Simply shine a light through the tank to see the current calcite levels and replenish as needed through the dome fill port. The calcite level should be monitored monthly and topped up annually or sooner if required. The tank and valve has a full 10 year warranty.
