

Mountainside Mobile Detailing

Weather Policy

At Mountainside Mobile Detailing, our top priority is delivering consistent, high-quality results while protecting your vehicle. Certain weather conditions directly impact the effectiveness and safety of our detailing process. To ensure the best possible outcome for every service, we follow the guidelines below.

Temperature Guidelines

- **Interior Detailing**

We require a minimum ambient temperature of **35°F or above** to safely and effectively perform interior services.

- **Exterior Detailing (Washes, Paint Correction, Ceramic Coatings)**

We require a minimum ambient temperature of **40°F or above** to perform exterior services.

These thresholds are necessary because our cleaning agents can freeze, coatings may not cure properly, and cold surfaces can result in streaking, spotting, or an uneven finish.

Weather-Related Rescheduling

If the forecasted temperature at your service location falls below our required thresholds, we will proactively reach out **24–48 hours in advance** to:

- Adjust your start time later in the day, or
- Reschedule your appointment to the next suitable date at no additional charge

High Winds, Precipitation, or Severe Weather

Strong winds, snow, sleet, freezing rain, or heavy rain may also require rescheduling to ensure safety and finish quality. In these cases, we will communicate as early as possible and work with you to secure the soonest available weather-appropriate date.

Quality-First Promise

We never rush or compromise the quality of our work due to weather conditions. If we believe conditions could negatively affect the final result, we will always recommend rescheduling in your best interest.

Thank You for Your Understanding

We appreciate your flexibility and understanding as we prioritize the care, safety, and long-term protection of your vehicle. If you ever have questions about weather conditions or scheduling, please feel free to reach out.
