

The International Osprey Foundation Platform Installation Guidelines

Lovers of Osprey everywhere enjoy watching these incredible raptors. One way is to install a platform on your property, and have a front row seat to all their comings and goings.

If you wish to proceed with a platform installation on Sanibel, here are some suggested steps you should take.

- Obtain permits from the City of Sanibel and follow all recommended set-backs and requirements. It is sometimes helpful to call the city planning department and have someone come out to your home. This will enable them to further advise you and will streamline the permit approval process.
- Notify and obtain permission from your neighbors that they do not object to your plans.
- Notify and obtain permission from your HOA that this is a permitted activity in your community.
- TIOF will support and offer advice at any point and will be able to provide a nesting platform that meets specifications of Florida Fish and Wildlife Guidelines.
- TIOF's planning materials will provide you with some information about ospreys, the application process and forms, as well as other helpful information. If you have any further questions, we are always available to help. Good luck and enjoy your new avian neighbors!

Osprey Pole Installation Neighborhood Notification Agreement
