

# ASCENT-4AS

- 4AS comes fully programmable and is calibrated with all the materials; adding future new materials is extremely easy.
- Non-proprietary Extrusions: 35mm=1.37", 50mm=2", 80mm=3", and 100mm=4", the assembly system UL certified
- Aluminum coils up to 0.063" thickness, 7" height
- Stainless steel up to 0.040" thickness, 7" height
- Extrusion is a preprinted epoxy white that can be used without repainting or as an excellent primer for different colors.
- The Ascent extrusions system is certified by UL for indoor and outdoor use for letters up to 66."
- Ascent equipment is the only system that can make letters in height from 3."
- Low-skilled operators can easily do machine operation and the final assembly of channel letters after three hours of training.
- Ascent includes installation, start-up, and complete training on the equipment with every machine.
- The Ascent 4AS equipment utilizes different knife and cutter heads for aluminum and stainless steel (software-driven), producing more accurate letters.
- The Ascent equipment uses electrical power (110V/30Amps) and compressed air (21CFM), making for a cleaner, more efficient operation.
- The 4AS machine can produce side plastic returns.
- The machine is supplied with extrusions for installation and training and a pneumatic gun with 6mm pins for assembly.
- The machine is supplied with all the necessary components (computer running on Windows 10, aluminum extrusion holder, coiled holder, and pneumatic gun)
