

GRAND LEGACY TATTOO

Professional Tattoo Aftercare Instructions

IMMEDIATE CARE (First 24 Hours)

- Remove any wrapping or covering within one hour of getting tattooed.
- **Washing:** Wash your hands before cleaning the tattoo. Use clean hands to gently wash the tattooed area with very warm water and plain liquid antibacterial soap (dye-free/fragrance-free).
- Rinse off the soap with very cold water, and then pat the area dry with a clean towel.
- Do nothing else with the tattoo other than cleaning it for the first day.

ONGOING CARE (Starting 24 Hours After)

- **Daily Washing:** Begin washing daily for the duration of the healing period.
- **Moisturizing:** After washing the tattooed area, apply a very small amount of plain (fragrance-free), water-based, white lotion, such as Lubriderm, Jergens, or Eucerin.
- Gently rub the lotion until it is completely absorbed into the skin.
- **Check:** If the tattoo is shiny and wet-looking after applying lotion, too much was used. Wash and dry the tattoo again, then reapply a smaller amount of lotion.
- Repeat this process daily until fully healed.

CRITICAL DON'TS

- **DO NOT PICK OR SCRATCH** at the tattooed area. Allow the top layer of skin to dry and flake off at its natural pace.
- **DO NOT SUBMERGE** the tattooed area under any bodies of water (including pools, baths, oceans, and rivers) until the tattoo is fully healed.
