AVENEER EV1

FEBRUARY 2-12, 2026

*Qualifying purchase amount must be on one receipt made at participating authorized Brother dealer locations February 2nd-12th, 2026. Refurbished or used machines do not qualify. Discounts may result in the qualifying purchase amount not being satisfied. No interest will be charged on promo purchase balance including related optional debt cancellation fees, and equal monthly payments are required on promo purchase until it is paid in full. The payments equal the amount financed divided by the number of months in the promo period, rounded up to the next whole dollar. These payments may be higher than the payments that would be required if this purchase was a non-promo purchase. During the last month(s) of the promo period the required monthly payment may be reduced due to the prior months' rounding. Regular account terms apply to non-promo purchases. New Accounts as of 07/31/2025: Purchase APR is 34.99%. Penalty APR is 39.99%. Min Interest Charge is \$2. Existing cardholders: See your credit card agreement terms. Subject to credit approval. ©2026 Brother International Corporation.

For February - - - Options for Embroidering on Fleece

Prepare and Embroider Center Front

Set up the machine for embroidery. General guidelines for embroidering the motifs are as follows:

The center front features three evenly spaced motifs that become part of the decorative closure. The motif is actually a segment of the design used for the pockets. The motifs look a bit unfinished at first but keep in mind these motifs are finished off with buttons and loops. Wind a bobbin with matching embroidery thread for a neat finish on the wrong side.

Use a wash-away marker or chalk to clearly mark the center position of each motif. Space motifs using the Embroidery Layout Guide as a reference for the center point of the design. Align the motifs so they are parallel to the top edge, stitching the designs lengthwise in the 5" x 7" hoop. Note the safety pin at the top edge of the fabric.

Stabilize the fabric for each motif by placing a generously sized piece of fibrous water-soluble on the wrong side of the fabric. I recommend securing this to the wrong side of the fabric by pinning all around the perimeter. Figure 3.

Add a layer of film-type water soluble on top, and hoop the three layers together. Figure 4. Remove excess stabilizer between motifs, beginning with a new piece for each hooping. Excess fibrous water-soluble can be removed by cutting; film type will easily tear away. Follow package instructions for complete removal of all remaining water-soluble when wrap is complete.

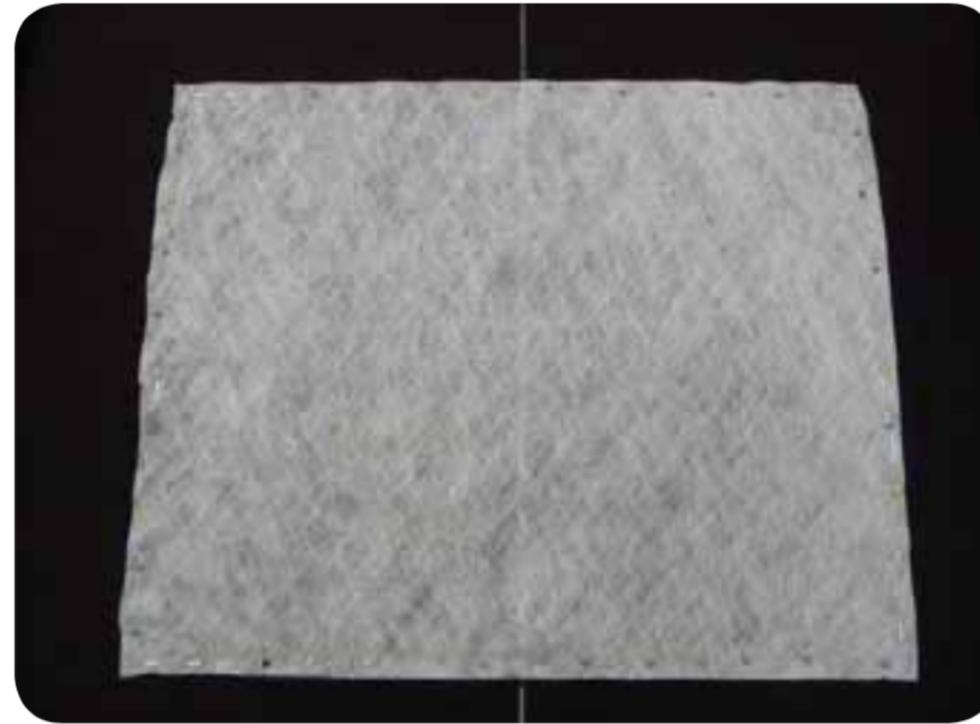

Figure 3

Figure 4

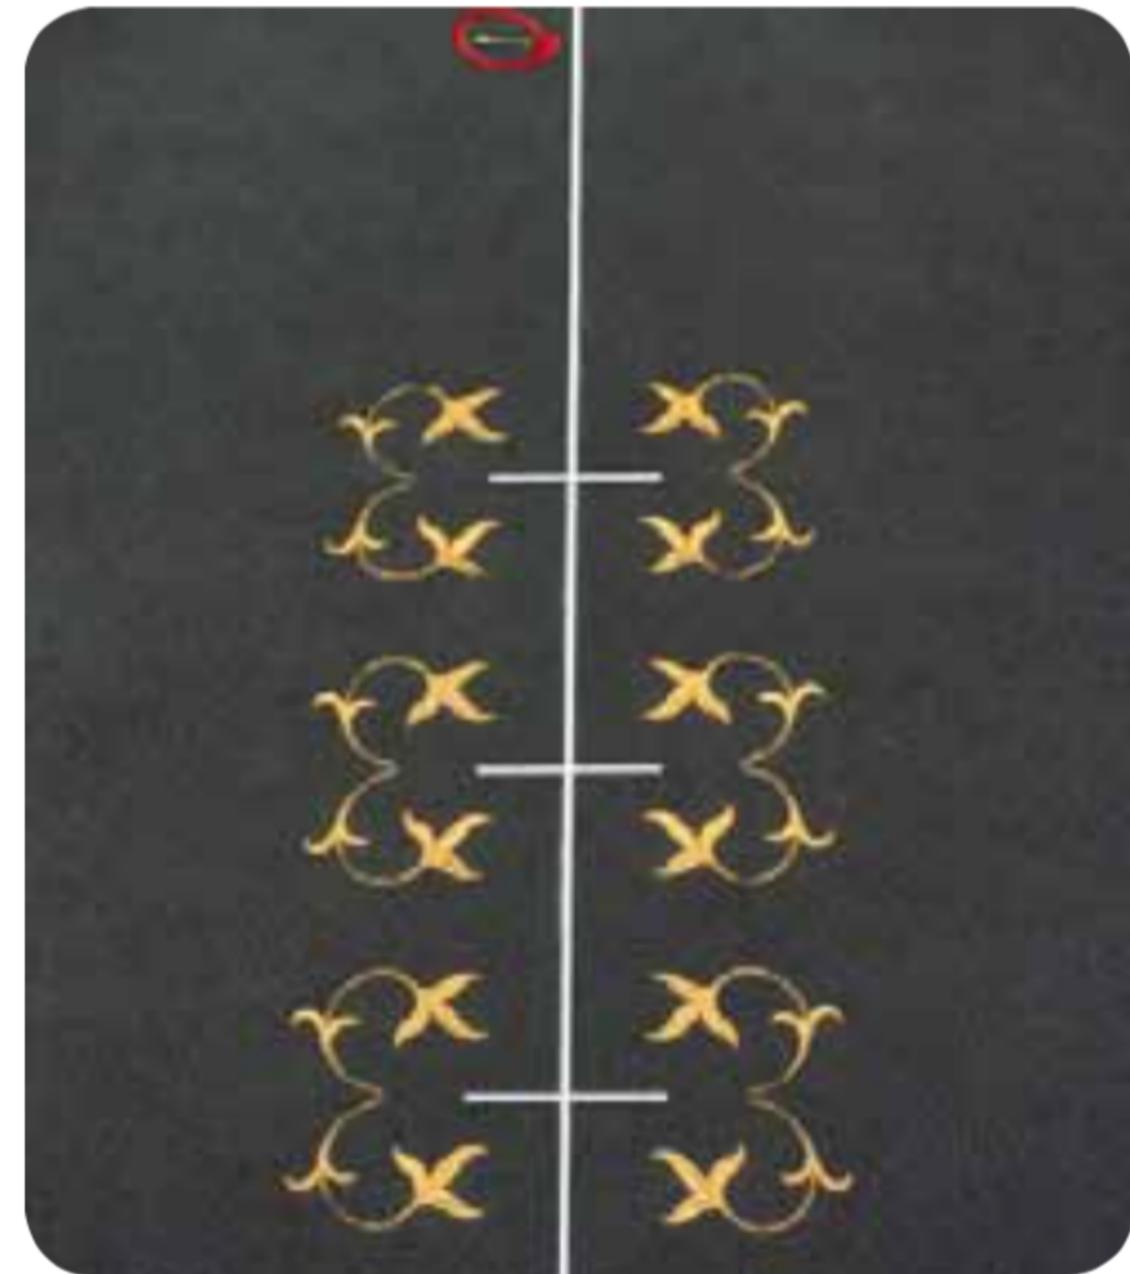

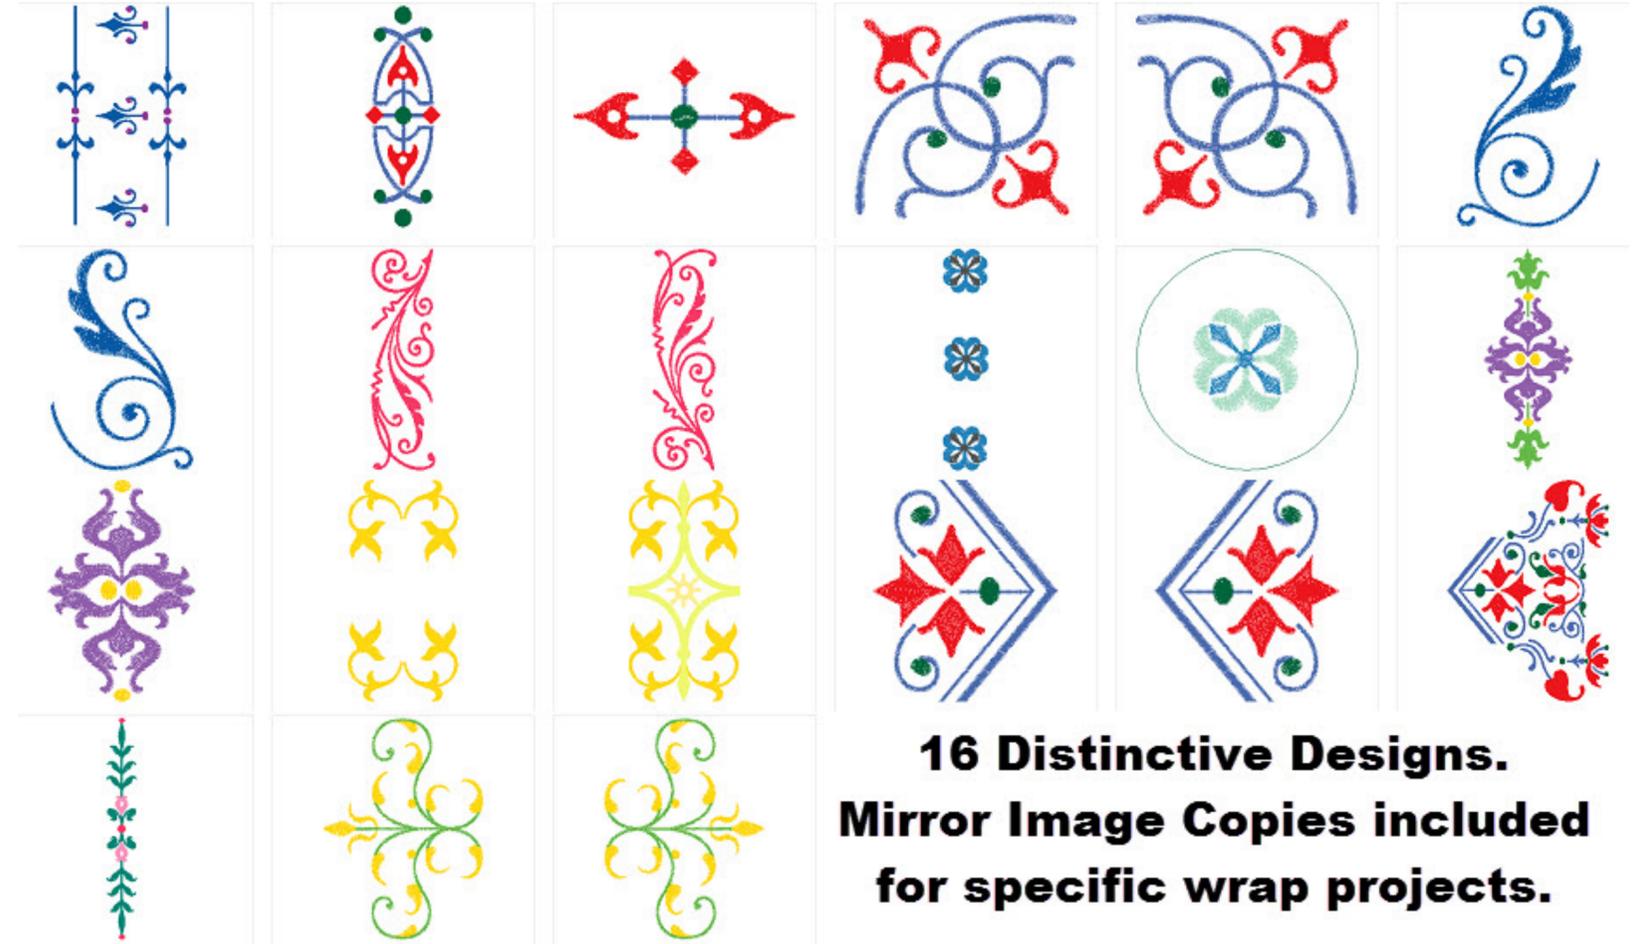

Figure 6

Use matching bobbin thread, wash away stabilizer, & designs suitable for embroidery without added stabilizer.

Pocket Instructions
[HERE](#)

Depending on your machine remember that you can also raise the presser foot with the presser foot lever, the command button, and my favorite option - **the knee lifter!** It pays to know your options and then experiment with whatever works best for you at any given time.
