

GREEN STUFF® ABSORBENT

GREEN STUFF® ABSORBENT IS...

- Non-mineral, phenolic resin absorbent.
- High performance absorbent.
- Versatile absorbent.
- Non-hazardous material.
- Environmentally friendly – Non-leaching.
- 90% lighter than clay.
- Fully absorbs synthetic motor oil.
- Less warehousing space required.
- Less vehicle and infrastructure degradation.
- Less waste material for disposal.
- The cost effective solution.

NEW FUEL BLENDING OPPORTUNITY

With a content of 12,000 BTUs per lb., it's the ideal medium for fuel blending operations. Paints, oils, greases, inks, coatings, solvents and adhesives when solidified with Green Stuff® Absorbent provide a clean-burning substitute for other fuels in kiln operations. Dramatic cost savings can be realized while long-term liability concerns are lessened because no waste goes into the landfill. Call today or check out our material safety data sheet to learn more about our materials.

INDUSTRIES USED IN:

- Fire/Hazmat Response
- Oil & Gas Drilling
- Tank Bottoms
- Airports
- Transportation
- Environmental Control
- Chemical Processing
- Solidification
- Drill Cuttings
- Automotive
- Hospitals & Labs
- Food Processing
- Agriculture
- Rubber & Plastics
- Aerospace
- Plant Maintenance
- Waste Management
- Paint & Coatings
- Military Operations
- Pharmaceuticals
- Household & Garden
