

GREENHOUSE GAS MANAGEMENT POLICY

1. PURPOSE

This Greenhouse Gas (GHG) Policy reflects Mula Hotel's commitment to reducing greenhouse gas emissions, improving energy efficiency, and minimizing environmental impact in line with principles of environmental sustainability. Our goal is to act responsibly in the fight against global climate change and to implement an effective greenhouse gas management system to protect our environment.

2. SCOPE

This policy covers all facilities, operations, and supply chain activities of Mula Hotel and includes all aspects related to greenhouse gas emissions.

3. OBJECTIVES

Mula Hotel implements this policy to promote environmental sustainability and reduce greenhouse gas emissions. Our objectives include conserving natural resources, protecting the environment, and contributing effectively to the fight against climate change. Mula Hotel commits to the following GHG policy goals:

3.1. Greenhouse Gas Emission Reduction:

Implement effective strategies and technologies to reduce greenhouse gas emissions.

3.2. Increasing Energy Efficiency:

Encourage the use of energy-efficient equipment across facilities to improve energy performance.

3.3. Use of Green Energy:

Invest in and promote the use of renewable energy sources.

3.4. Waste Management and Recycling:

Reduce greenhouse gas emissions through proper waste management practices.

3.5. Training and Awareness:

Educate and raise awareness among employees, guests, and suppliers about greenhouse gas emissions.

4. RESPONSIBILITIES

4.1. Management Team:

Provides leadership, allocates necessary resources, and guides the achievement of policy objectives.

4.2. Employees:

Responsible for understanding and implementing the policy, participating in efforts to reduce emissions, and improving energy efficiency.

4.3. Suppliers and Guests:

Encouraged to act in accordance with the greenhouse gas policy.

5. GREENHOUSE GAS MANAGEMENT PRACTICES

5.1. Greenhouse Gas Emission Reduction:

- Adopt energy-efficient technologies and processes to improve energy efficiency.
- Regularly review GHG inventories and develop action plans to meet emission reduction targets.

5.2. Use of Green Energy:

- Use renewable energy sources to reduce GHG emissions.
- Encourage environmentally responsible energy consumption among guests and staff.

5.3. Waste Management and Recycling:

- Establish and implement waste reduction and recycling programs.
- Reduce emissions through effective waste management practices.

5.4. Training and Awareness:

- Educate employees, guests, and suppliers on emission reduction and energy conservation.
- Organize awareness campaigns and introduce eco-friendly practices to guests.

6. REVIEW AND IMPROVEMENT

This Greenhouse Gas Policy will be reviewed annually to ensure its effectiveness and relevance. Revisions and improvements will be made as needed to align with the organization's goals and evolving best practices.
