

SUSTAINABLE PROCUREMENT POLICY

In line with our sustainable supply approach, we expect our suppliers and business partners to meet the following criteria:

- Possess Quality Assurance Management Systems, Environmental and Occupational Health & Safety Management Systems, and internationally recognized environmental and sustainability certifications or adhere to related ethical standards.
- Use and consume natural resources in a responsible manner that does not harm wildlife or ecosystems, and comply with hunting bans and other conservation regulations.
- Work actively to minimize waste and manage it properly, and offer alternatives with reduced or bulk packaging options.
- Provide eco-friendly, efficient, local, ethically sourced products; use recyclable or recycled materials; offer organic, bio, and chemical-free product alternatives.
- Be domestic or local producers/service providers whenever possible.
- Offer products or services that reflect and promote the cuisine, traditions, and culture of our country or region.

We place great importance on these criteria and communicate our expectations to all stakeholders and suppliers. Together with our suppliers, we strive to create efficient procurement opportunities and aim to reduce the environmental impact arising from our supply chain processes.
