

WILDLIFE OBSERVATION AND OUR WILDLIFE POLICY

1. Our hotel commits to being aware of and fully complying with existing local, national, and international regulations and guidelines regarding wildlife observation and wildlife interactions.
2. Our staff will be trained to protect wildlife and ensure sustainable interactions in all activities of our hotel.
3. We will inform our guests to respect the natural environment and inform them about local regulations and guidelines. Additionally, we will encourage our guests not to disturb or endanger wildlife and not to pollute natural habitats.
4. Our hotel will take necessary measures to prevent activities and practices that may disturb wildlife and will act in accordance with local regulations. This includes avoiding obstruction of natural migration routes, nesting areas, or feeding zones and preventing harm to local fauna and flora.
5. Our hotel aims to provide guided services to inform our guests about wildlife observation and wildlife interactions and to encourage participation in tours organized in local nature conservation areas. These tours will be conducted appropriately, in a regulated and environmentally friendly manner to observe wildlife.
6. Our hotel commits to the continuous review and improvement of wildlife conservation and sustainable tourism practices. In this regard, we will monitor local and international regulations, consider new scientific findings, and adopt best practices.
7. Our staff will receive ongoing training to fully comply with the hotel's wildlife policy and provide accurate information to our guests. They will act with sensitivity and responsibility regarding wildlife protection.
8. In cases where international recognized standards do not specifically approve or no standards exist, direct interactions, especially feeding, are not permitted based on the advice of an independent wildlife expert. Such interactions can affect the natural behavior of wildlife, pose potential health risks, and disrupt the local ecosystem balance. Therefore, our hotel will ensure that direct interactions with wildlife are carefully controlled.

This policy reflects our hotel's commitment to wildlife conservation and sustainable tourism practices. All our staff and guests are responsible for complying with this policy and are expected to actively contribute to our hotel's wildlife protection efforts.
