

EFFICIENT WATER MANAGEMENT AND CONSERVATION POLICY

1. PURPOSE

As Mula Hotel, the Efficient Water Management and Conservation Policy summarizes our commitment to responsible and sustainable water management practices. Our aim is to ensure the efficient, equitable, and environmentally responsible use of water resources in all our operations and activities. This policy serves as a guide to support our water management objectives for all employees and stakeholders.

2. SCOPE

This policy applies to all facilities, employees, and contractors of Mula Hotel and covers all water-related activities including but not limited to water supply, consumption, treatment, and discharge.

3. OBJECTIVES

Mula Hotel commits to the following water management objectives and is dedicated to responsible and sustainable water management. By adhering to this policy, we believe we can contribute to responsible water resource management, protect the environment, and ensure the availability of clean and safe water for current and future generations.

- **Water Efficiency:** Strive to reduce water consumption and improve water use efficiency in our operations and activities.
- **Environmental Responsibility:** Minimize negative impacts on local ecosystems, water bodies, and aquatic life through responsible water use and discharge practices.
- **Compliance:** Ensure compliance with all relevant local, national, and international water-related regulations and standards.
- **Resource Conservation:** Promote responsible management of water resources to safeguard water availability for future generations.

4. RESPONSIBILITIES

- **Senior Management:** Senior management will lead by example in responsible water management and provide the necessary resources to effectively implement this policy.
- **Employees:** All employees are responsible for understanding and applying this policy, reporting water management concerns, and participating in water conservation efforts.
- **Contractors and Suppliers:** All contractors and suppliers working with Mula Hotel are expected to comply with this policy and are encouraged to adopt similar practices.

5. WATER MANAGEMENT PRACTICES

- **Water Efficiency:** Implement water-saving technologies and practices in our operations. Regularly monitor and report water consumption, identifying areas for improvement. Promote water recycling and reuse wherever possible.
- **Environmental Responsibility:** Monitor and control water quality to ensure compliance with applicable regulations to prevent pollution. Take measures to protect and restore local aquatic ecosystems. Participate in community initiatives for water conservation and preservation.
- **Compliance:** Maintain knowledge of and comply with all relevant laws, regulations, and permits related to water. Conduct regular audits and reviews of water management practices to ensure compliance.
- **Resource Conservation:** Support water conservation efforts within our communities. Promote water sustainability and education among employees and stakeholders.
- **Review and Improvement:** This Water Management Policy will be reviewed annually to ensure its effectiveness and relevance. Mula Hotel will make necessary changes and improvements to align with our objectives and evolving best practices.
