

A SINGLE SYSTEM TO STREAMLINE YOUR PROJECT-BASED OPERATION

Mobile Apps for Android and iOS Devices

A Platform Built for Collaboration & Mobility

Internal Users (Employees)

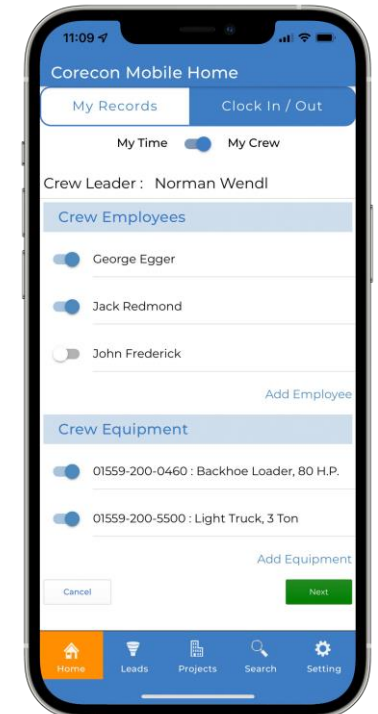

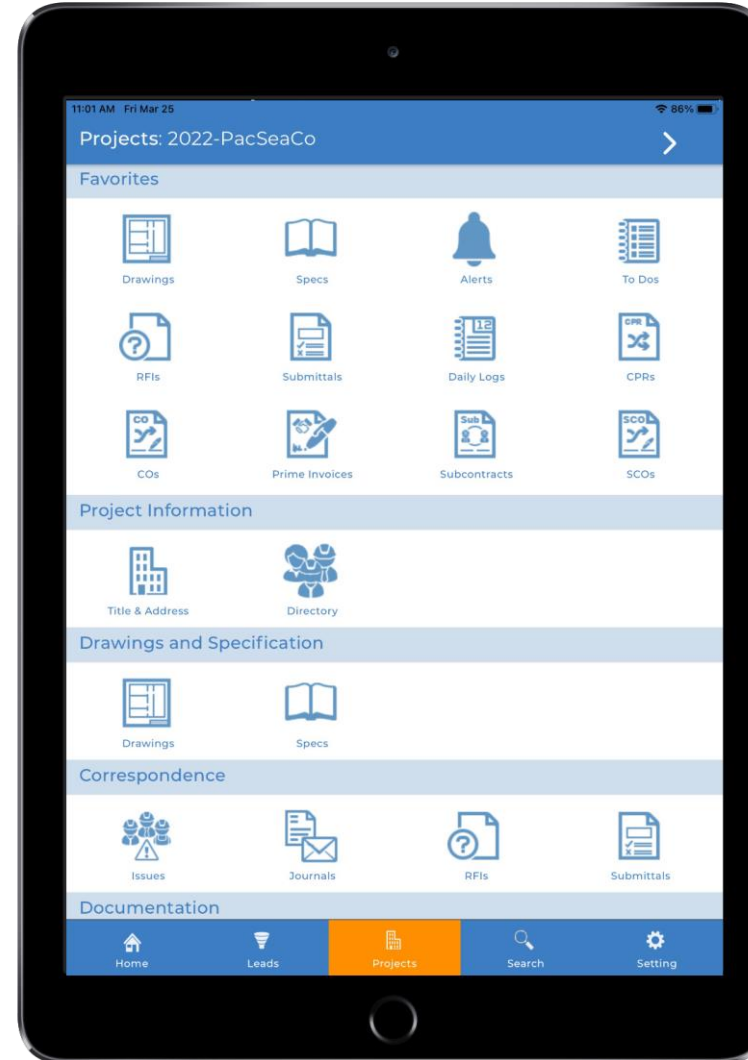

External Project Team Members (Customers, Vendors, Architects)

New Corecon Mobile Apps

New Mobile Apps for Android and iOS devices are free to all subscribers but are especially geared for field staff that are on the go. Information entered in the Mobile Apps will immediately appear in Corecon. Thus, access to real time data is just a click away.

New Release Highlights:

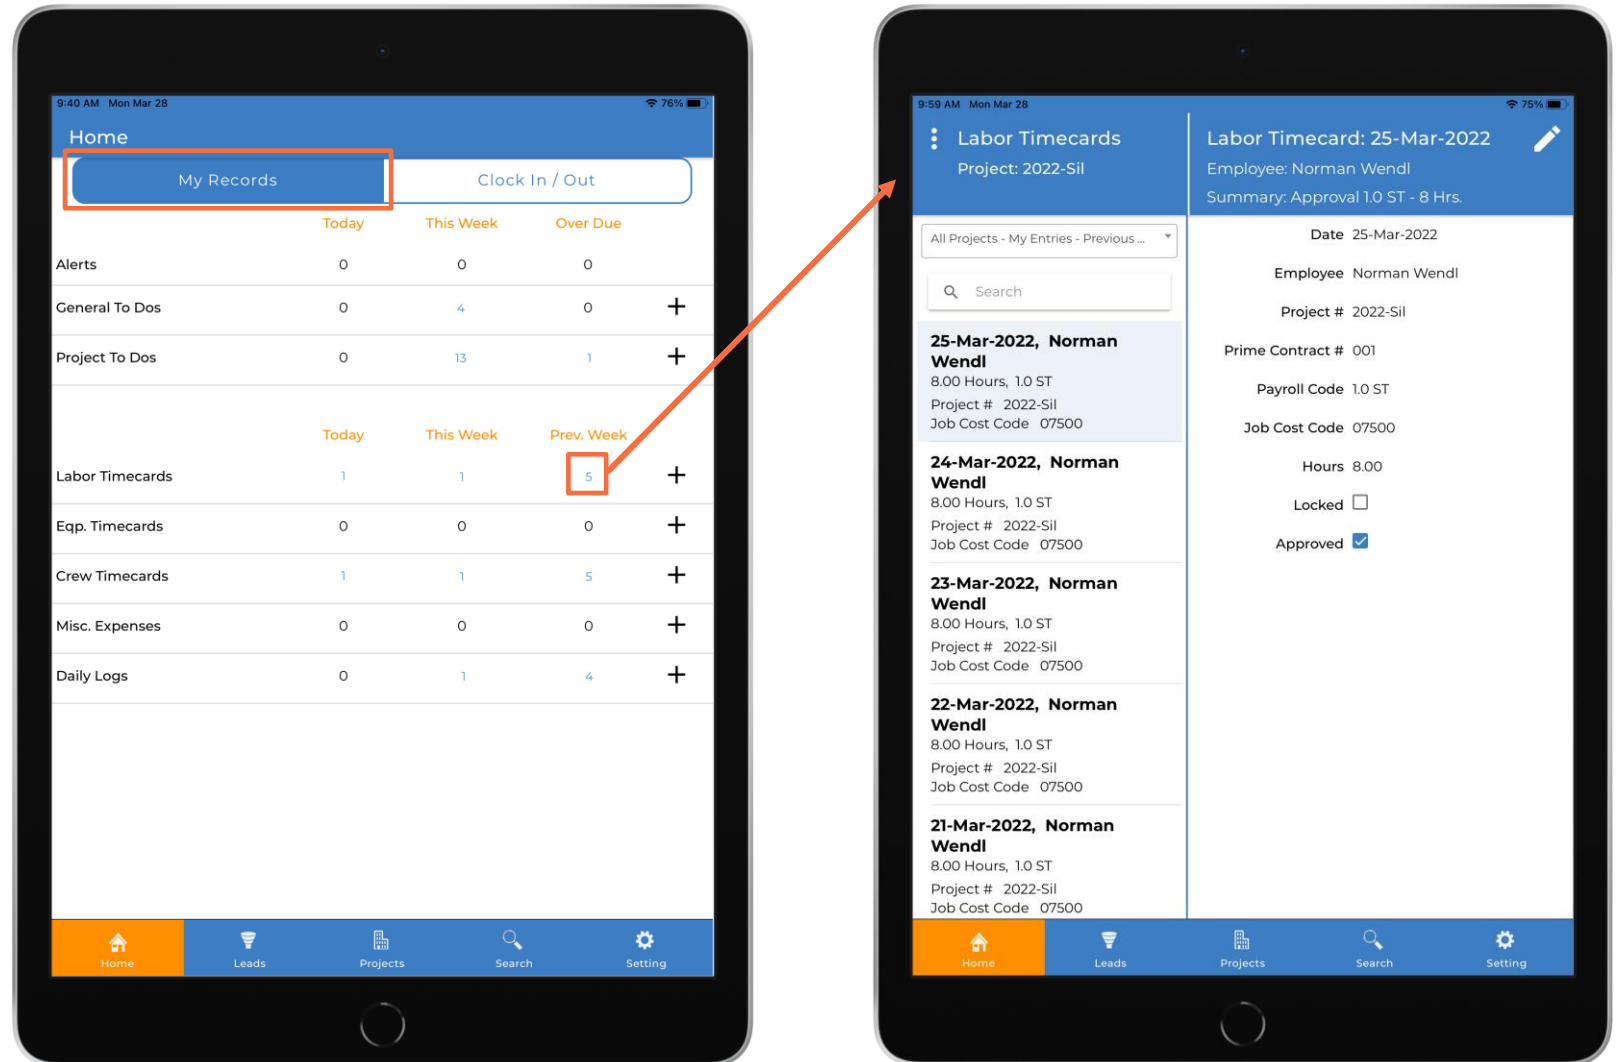

- Completely rebuilt using the latest mobile technologies.
- New biometric options (ie. finger and facial recognition) to login to App.
- Separate Read and Edit forms to avoid data entry mistakes.
- Streamlined data entry process for all features.
- New Clock In/Clock Out feature with Geotagging for Employees and Crews
- Email options for features such as Journals and RFIs including templates to standardize messaging.
- Additional QC and Safety features such as Permits, Safety Incidents and Site Hazard Assessments.

Mobile App Home View – My Records

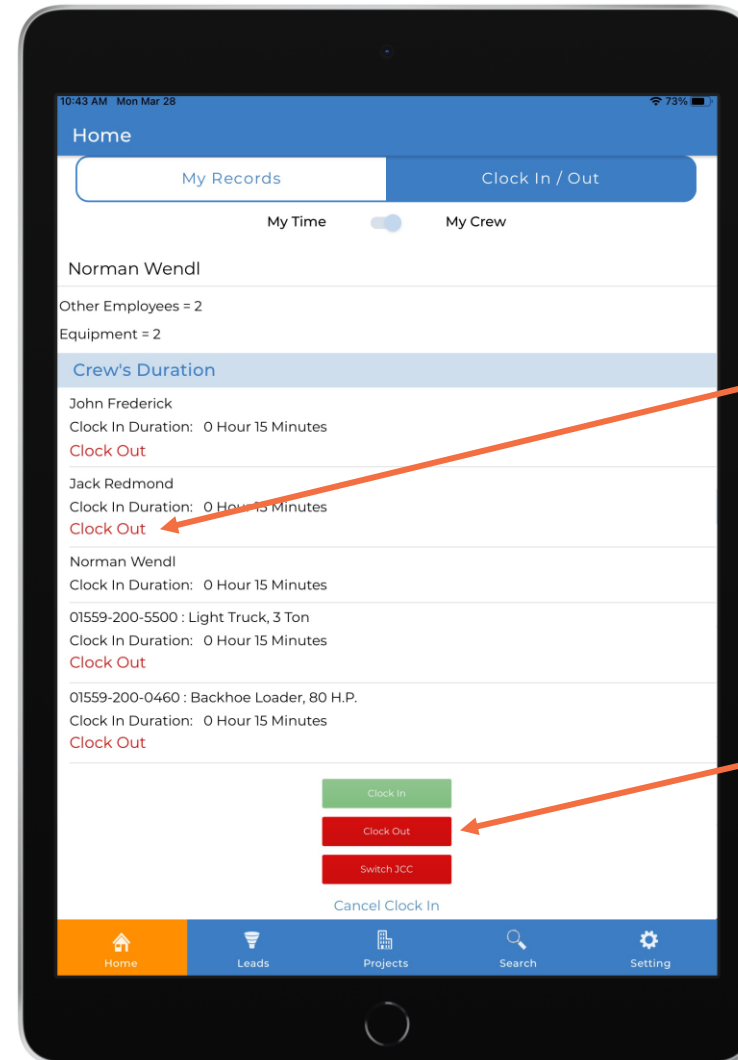

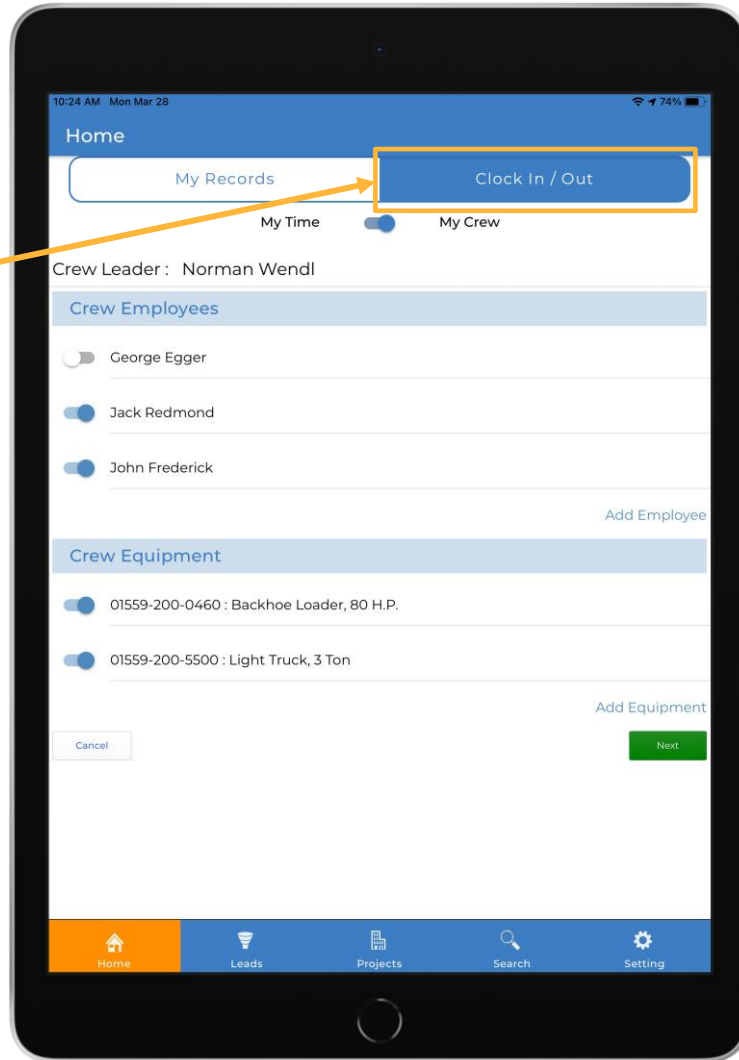

Upon logging into the app, users will have immediate access to entries that are typically done on a daily basis such as timecards, expenses and daily logs.

Companies that have enabled workflow for transaction approvals is also incorporated into the App as shown on the right.

Mobile App Home View – Clock In / Clock Out

Employees or Crews can quickly Clock In or Out directly from the Home View.

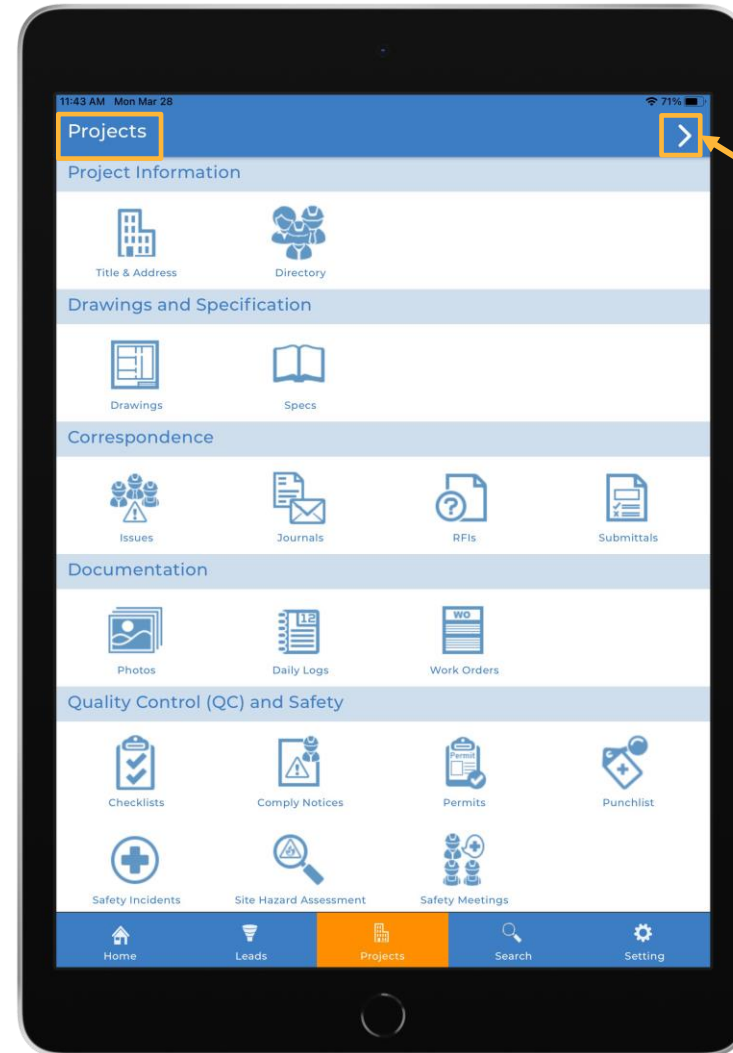

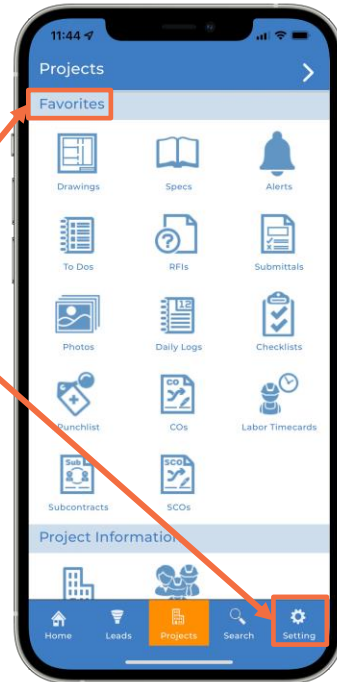

Clock Out individual Crew Member

Clock Out entire Crew

Mobile App Projects View

Users can select their own Favorite Features in their Profile which minimizes scrolling on Lead and Project Menus.

Click Right Arrow to select Current Project

Mobile App - Project Information Form Layout

There can be up to three tabs of information depending on the type of Project record.

Certain features such as Daily Logs and POs have sub-tables. Clicking the plus sign (+) will allow the user to enter additional items.

The image displays three mobile app screens side-by-side, each showing a different view of a project record for 'Project: 2022-Sil' by 'Author: Steve F. Bradshaw' on 'Daily Log: 23-Mar-2022'. The app has a blue header and a bottom navigation bar with icons for Home, Leads, Projects (highlighted), Search, and Setting.

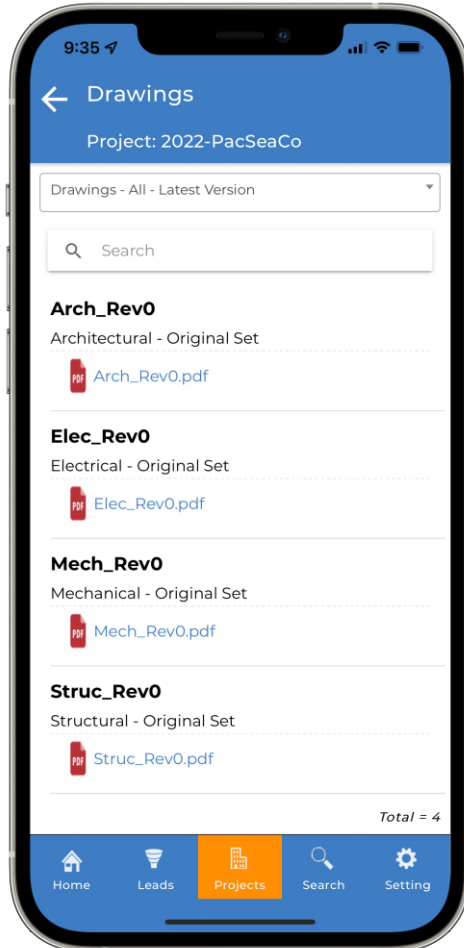

- Left Screen (Activities View):** Shows a list of activities and site conditions. The 'Activities' section has a plus sign (+) to add more. The 'Weather and Site Conditions' section also has a plus sign (+). Below these are sections for 'Manpower (All Trades)', 'Major Equipment (All Trades - Own...)', 'Major Material Deliveries', and 'Visitors', each with a plus sign (+).
- Middle Screen (Details View):** Shows project details including 'Project # 2022-Sil', 'Author Company Tower General Contracting', 'Author Contact Steve F. Bradshaw', and a 'Notes' section with the text 'Poured slab today.'
- Right Screen (Linked Files View):** Shows a list of linked files, including 'Image_01.jpg' and 'Image_02.jpg', both uploaded on '01-Jul-2020'. There is an 'Add Photos' section with options to 'Take Photo' and 'Add From Images'.

Red arrows indicate the transition between the 'Related', 'Details', and 'Linked Files' tabs. A blue arrow points to the plus sign (+) in the 'Manpower (All Trades)' section on the left screen. An orange arrow points to the pencil icon in the top right corner of the right screen.

By default, information is shown in read only mode to prevent accidental data entry mistakes. Clicking the pencil icon will switch to edit mode.
