

ENGINEERING & STRATEGIC CONSULTING

At Prozus, we offer a range of engineering and consulting services, ready to team up with you at every step of your technical project. Whether you're just tossing around ideas during the planning phase or diving into the nitty-gritty of full-scale engineering design, we're here to make it happen!

AS-BUILT DRAFTING SERVICES

Our meticulous drafting helps you maintain accurate records, simplify future modifications, and enhance efficiencies – all with a rapid turnaround time. We can even do overnight drafting, field verification and walkdown services.

FEASIBILITY STUDIES & BUSINESS CASES

We dig into your project with thorough site assessments, financial projections, permit planning, and grant guidance to make sure it's set for success from the start.

ENGINEERING DESIGN

Our crew crafts process, civil, structural, mechanical, and electrical designs for fresh builds, upgrades, or infrastructure revamps, turning your ideas into reality.

PROJECT PLANNING & DEVELOPMENT

We help map out land use through Field Verification & Walkdown Services, tackle zoning, streamline permits, and shape concepts for energy, utility, and commercial infrastructure projects.

RENEWABLE ENERGY ENGINEERING

From sizing systems to modeling performance, planning interconnections, and offering expert advice, we've got solar, battery, hybrid, and microgrid projects covered.

3D LASER SCANNING FOR DIGITAL TWINS

We use high precision laser scanning tools to capture your facility or asset exactly as it exists, then develop 3D models in the software platform of your choice.

HAZOP PROCESS SAFETY REVIEWS

We can provide a full review of your P&ID's, GA's, Control Narratives, and other critical documentation to provide a list of recommended actions to remove barriers to operational safety and efficiency.

DOCUMENT SCANNING WITH AI CATEGORIZATION

Have boxes of physical documents you need digitized? We can help you scan them into a SharePoint so your teams can access them from anywhere. Our AI will categorize them into a custom system and name them so you can search through your metadata.

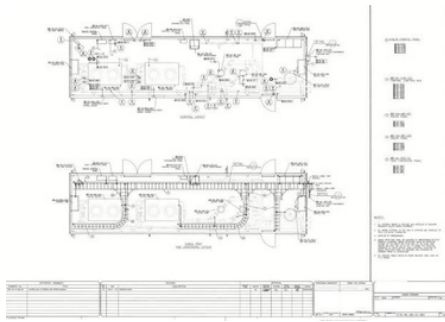

SECONDMENT SERVICES

We offer short or long term secondment of skilled engineers who integrate seamlessly into your team, supporting your projects without the overhead of permanent hires.
