

When it comes to dissolving concrete buildup on trucks, nothing works better than glycolic acid; and here's why:

- ✓ More effective cleaning power, and less labor intensive than muriatic or phosphoric acids
- ✓ Easy to handle and readily dilutable to any desired concentration
- ✓ Outstanding compatibility for blending with other acids to improve performance

Education

We're excited to teach our customers how to save on chemical costs by comparing our products, pricing, and performance against competitors.

We'll show you what the real cost of cleaning should be, and help you balance expenses with:

- ▶ Low-flow foaming applicator
- ▶ Driver kiosks
- ▶ Affordable accessories
- ▶ Driver training
- ▶ Controlled usage

Chemical

85% of Indigo customers prefer Glycolic Acid for daily truck washing and heavy concrete removal.

- ▶ Glycolic acid deeply penetrates concrete pores
- ▶ Low corrosivity
- ▶ Can be safely used on metal and other surfaces
- ▶ Easy on the environment; readily biodegradable

We offer ready-to-use and concentrated products to save you money.

Application

Application plays a crucial role in maximizing the effectiveness of chemical cleaners.

We offer an innovative application solution with a proprietary low-flow foaming applicator that:

- ▶ Delivers controlled and consistent coverage to easily break down heavy buildup
- ▶ Limits overuse / misuse of products
- ▶ Industry best low-flow rate of .8 GMP (versus a traditional 1.6 GMP)

Clean Trucks

By combining education with a more effective chemical cleaner and the right applicator, we can help you:

- ▶ Implement an easy, affordable cleaning program for your drivers
- ▶ Increase driver morale and company pride
- ▶ Improve your company's fleet appearance with clean trucks that make a great first impression
