

Emery County School District

Policy ECBA—School Plant

Date Adopted: 18 June 2025

Current Review / Revision: 18 June 2025

Grounds—

School grounds shall be constructed and maintained in conformance with Utah Department of Health requirements and applicable building codes.

[*Utah Admin. Rules R392-200-4 \(June 14, 2023\)*](#)

Buildings—

Every school building shall be located on grounds that are well-drained and maintained in a sanitary condition and in accordance with Utah Department of Health requirements. All buildings shall be provided with appropriate sanitary facilities and controls, a heating system, lighting facilities, ventilation systems, and health and safety facilities, all of which shall conform with Utah Department of Health requirements.

[*Utah Admin. Rules R392-200-7 \(June 14, 2023\)*](#)

[*Utah Admin. Rules R392-200-8 \(June 14, 2023\)*](#)

[*Utah Admin. Rules R392-200-9 \(June 14, 2023\)*](#)

[*Utah Admin. Rules R392-200-10 \(June 14, 2023\)*](#)

Carbon monoxide detectors—

Each school building shall be equipped with carbon monoxide detectors as required by state statute.

[*Utah Code § 15A-5-204\(19\), \(20\) \(2023\)*](#)

[*Utah Code § 15A-5-205.5\(1\)\(g\) \(2024\)*](#)

[*Utah Admin. Rules R277-400-12 \(July 11, 2023\)*](#)

Food service facilities and equipment—

All school lunchrooms, dining areas, and food preparation areas shall be maintained in accordance with Utah Department of Health requirements and local health department regulations. Any food provided by the school shall be obtained, transported, and served from approved sources according to Utah Department of Health regulations.

[*Utah Admin. Rules R392-100 \(December 12, 2019\)*](#)

[*Utah Admin. Rules R392-200-19 \(June 14, 2023\)*](#)

Custodial services—

All school buildings and appurtenances to buildings shall be maintained in a sanitary manner, and all building custodians and janitors shall be trained to perform their duties.

Pest management—

The District is required to minimize in school buildings and on school grounds the presence of pests that may carry disease, may carry allergens likely to affect individuals with allergies or respiratory problems, or may sting or bite causing mild to serious reactions. The District shall establish integrated pest management practices and principles to prevent harmful levels of pest activities in school buildings and school grounds with the lowest possible risk to people, property, and the environment. The District shall establish a written integrated pest management plan meeting the requirements of Utah Department of Health regulations. (This may be provided by a pest management contractor.)
