

Welcome to Third Grade Class of 2026

Dear Future 3rd Grade Students,

This packet will include Math and Reading assignments to help better prepare you for next year. If you need the decodable reading books, they can be picked up at the school office during their summer hours.

Here are some other activities to help keep your child's skills strong over the summer;

- * Read! Read! Read! The public library has a wonderful summer reading program and a great way to stay cool on those hot summer days. Mark your summer reading calendar as you go!

- * Practice your Math facts. Keep addition/subtraction flash cards in the car for a red light challenge. How many problems can you get done before the light changes? Write a summer budget and have your child keep track of the money they spend. Make Math a part of everyday life. We will be learning multiplication and division this year.

- * If you are traveling, learn a little bit of the history of where you are going. Go to the visitor's center and grab some free information. We study our state in third grade, so if you travel around SC, take pictures and notes along the way. Journal your vacations to help you remember the fun time you had.

- * Plant something! Pick something! Or watch something outside (and don't forget the sunscreen) Summer and Science go hand in hand!

- * On a rare, rainy day- build with legos, do a puzzle, play a board game, write a story, create a piece of artwork and maybe even build a house of cards!

- * Most importantly, keep praying and going to Mass. Check out new Churches as you travel. Compare the differences and when you find something great that you love, write it down on your Mass reflection sheets and tell me about it when we are back in school.

Have a safe and wonderful summer,

Ms. Bradley
