

Pest Control Service Preparation Guide

Thank you for choosing our pest control services.

To ensure the best possible results and to maintain warranty periods, we kindly request that all properties are **clean and tidy before we attend**.

Please carefully read the preparation instructions and vacate times below relevant to your service.

German Cockroach and Pantry Moth Treatments

- Empty and clear all affected areas (pantry, cupboards, drawers, sink) so we can treat them properly.
- Clear any areas within 3 meters of the infestation where cockroaches could hide or live.
- Dispose of any potentially infested food sources (pantry moths can lay eggs or larvae in packaging seams or holes).
- Do not move electrical items out of the kitchen, as this may spread the infestation further.
- Empty and dispose of all cardboard food or grocery boxes brought in from outside.
- Vacate the property during treatment and remain out for 2 hours after completion.

Important Reminder

Following these preparation steps helps us carry out the treatment safely and effectively.

Your cooperation ensures the best results and protection for your property.

Thank you for your understanding and for helping us deliver a quality service.
