

# Upgrade to Self-Storing Aisle Rails

*During your Renovation*

If your facility is in need of a renovation, Interkal can retrofit our Self-Storing Aisle Rails (SSAR) onto bleachers for added stability and safety. The SSAR requires no additional labor for setup, since they remain in a permanently fixed position. Your bleachers will be just as easy to set up and retract, but safer for your patrons. There's no down side to the intuitive Self-Storing Aisle Rails, and they can only be found at Interkal.

*Self-Storing Aisle Rails easily extend and retract along with the telescopic system, requiring no extra labor*

*With just a simple upgrade, keeping your guests safe and sound is easier than ever*
