WHA Resources Welcomes Arctic Wolf as Endorsed Vendor

WHA Resources would like to announce the addition of Arctic Wolf as an Endorsed Vendor for Cyber Security as a service. Through this partnership WHA was able to negotiate group discounts. Arctic Wolf representative Jack Siegel will team with Tom Hinchsliff at EPC USA Inc. to help facilitate the adoption of Arctic Wolf and their different services.

Arctic Wolf is the global leader in security operations, delivering the first cloud-native security operations platform to end cyber risk. Powered by threat telemetry spanning endpoint, network and cloud sources, the Arctic Wolf® Security Operations Cloud ingests and analyzes trillions of security events each week to enable critical outcomes for most security use cases. The Arctic Wolf Platform delivers automated threat detection and response at scale. It empowers organizations of any size to stand up world-class security operations with the push of a button.

A few unique things about Arctic Wolf:

- They provide security services;
- They fit into your existing security tool stack – Do not need to rip and replace existing tools;
- They Monitor EVERYTHING from Endpoints, Network, Applications, Cloud, AD, Email etc.;
- They provide a security triage team to monitor and respond to all incidents, but also give an additional three dedicated security experts to help with proactive work like updates, reconfiguring tools, and ad hoc security advice; and
- A large percentage of their customers fall into the Healthcare space as they solve or help maintain many of their compliance needs.

The services they offer are:

- Managed Detection and Response, 24 x 7 monitoring of your network.
- Managed Risk, Constantly checking for vulnerabilities both inside and outside of your network.
- Managed Security Awareness, End user training so employees learn to recognize and neutralize social engineering attacks
- Aurora Endpoint Security, AI-driven prevention, detection and response to stop endpoint

- threats before they disrupt your business.
- Security Operations Warranty, Stay covered at no cost with up to \$3M in financial assistance for cybersecurity incidence.

For more information, visit their website at: arcticwolf.com or contact Josh Hannes at 307-632-9344 josh@wyohospitals.com

Healthcare Emergency Management Course

Mountain Plains Regional Disaster Health Response System (Denver Health) and the Wyoming Healthcare Preparedness Program are offering a Healthcare Emergency Management (HEM) Course on July 28 in Gillette, Wyoming. This course is free to participants from Region 8 states.

HEM is a comprehensive, real-world training designed to prepare healthcare professionals to effectively plan for, respond to, and recover from emergencies and disasters that impact healthcare systems.

Through interactive modules, participants gain practical skills in disaster response, incident command, and emergency planning, explicitly tailored to the healthcare setting. The course emphasizes real-world application, collaboration, and systems-based thinking to build organizational resilience.

Whether you're new to emergency management or seeking to strengthen your leadership in crisis response, the HEM Course equips learners with the tools and confidence to support healthcare continuity and patient care during times of crisis. This activity has been approved for AMA PRA Category 1 Credit™.

Blue Cross Blue Shield of Wyoming Responds to Maternity Care Gaps with Launch of New Wellness Program

Blue Cross Blue Shield of Wyoming (BCBSWY) is launching a comprehensive Maternity Care Program the week of July 7 to support maternal health and respond to growing concerns about access to care—particularly in Wyoming's rural and underserved communities.

The new program offers coordinated access to essential services before, during, and after pregnancy, helping address medical, emotional, and logistical challenges faced by expectant and new parents across the state.

"We understand that pregnancy and postpartum care can be overwhelming—especially in areas with limited access to services," said Dr. Lisa Brandes, medical director at BCBSWY. "This program is about more than just clinical care. It's about ensuring Wyoming families feel supported,

informed, and connected at every step.”

Program Highlights

The program provides centralized access to a broad set of maternity and postpartum services, which complement existing care from OB/GYNs or primary care providers.

1. Personalized Guidance and Enrollment Tools
2. Members will receive a new introductory guide that outlines available services and offers instructions on how to connect with BCBSWY’s Population Health Team. The team—comprising nurses, licensed social workers, physicians and pharmacists—will help identify the right level of support based on individual needs.
3. Prenatal Vitamin Support
4. Expectant members will have the option to subscribe to a physician-approved prenatal vitamin service that delivers supplements directly to their homes. Ordering instructions are included in the member guide and online resources.
5. Remote Monitoring for High-Risk Pregnancies
6. For members experiencing high-risk pregnancy symptoms—or those living in areas with little or no maternity care—BCBSWY is offering remote monitoring that connects directly to a digital platform and care team. Eligibility criteria apply and are reviewed by BCBSWY’s clinical staff.
7. Breast Pump Reimbursement – Members may purchase a breast pump and submit a claim for reimbursement.
8. Postpartum Mental Health Access
9. New mothers experiencing postpartum depression, anxiety or related challenges can connect with licensed mental health providers through a virtual platform specializing in postpartum depression.

In addition, all parents may utilize the National Maternal Mental Health Hotline at 1-833-TLC-MAMA (1-833-852-6262). This 24/7, free and confidential service connects callers with trained counselors who provide emotional support, referrals, and local resource connections.

1. Social and Community Support
2. Beyond medical care, BCBSWY’s Population Health Team helps families navigate issues such as housing, transportation, and financial barriers. This Wyoming based team works closely with community partners, including Wyoming 211, to ensure members receive the full range of support they need.
