ADDITIONAL SERVICE OPTIONS

We offer the following additional services, which are optional:

Additional body preparation services

It is our policy that human remains be identified whenever possible. The identification may be made by anyone who knew the deceased, including a relative, friend, neighbour, co-worker, or clergy person. While identification of a body is possible with the minimum required preparation, you may wish to consider opting for "basic preparation of remains" or embalming, as it might afford a more peaceful final viewing experience. Embalming is not legally required but may be recommended to preserve the body between the time of death and final disposition. The funeral director will be able to guide you on preparation options and make recommendations based on the condition of the body and the expected service needs.

Visitation

These are informal gathering periods that allow family and friends to come and pay their respects and offer comfort to a grieving family.

Funeral Services/Memorial Services or Celebrations of Life

This includes services, rites and ceremonies with the body present in a casket or cremated remains. A funeral/memorial service can be religious or non-denominational and can be held in various places, including in our chapel, at a place of worship, a venue such as a club or hall, or at the graveside.

CASKETS

The following caskets listed are those generally available. Additional options are available upon request. Unless otherwise noted, all caskets listed are standard adult size.
Minimum requirements for a casket:
For burial: The least expensive wood casket is suitable and is required by most cemeteries' by-laws for interment, in the interest of the health and safety of the workers involved in the interment process. A metal casket may also be used for burial. A growing number of cemeteries in Ontario offer "green" burials, which may consist of interment of a body without a casket. Since there is no legal definition for a "green" burial, it varies from one cemetery to another. For more information, please speak with one of our funeral directors, or visit www.greenburialcanada.ca.
For cremation: A body must be presented to the crematorium in a rigid, leak-proof casket that is made of a combustible material, such as wood or cardboard. Caskets containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive caskets below that are suitable for cremation.
For hydrolysis: A casket is not used for hydrolysis (also known as "aquamation"). In some circumstances, a hydrolysable container or shroud may be required. For more information on this alternative method of disposition, please speak with one of our funeral directors, or refer to the Bereavement Authority of Ontario's Consumer Information Guide.
