Folate Receptor Antibody Test

## CLINICAL TEST REPORT

### PATIENT INFORMATION

First Name:		Last Name:
Date of Birth (mm/dd/yyyy):	Gender:	Referral Lab ID (if applicable):
Specimen ID:		Report Release Date:
Specimen Collected Date:		Specimen Received Date:

### PROVIDER INFORMATION

Provider Name:	Email:
Telephone:	Secure Fax:
Method used for Receiving Results: <input type="checkbox"/> Email <input type="checkbox"/> Fax <input type="checkbox"/> Portal <input type="checkbox"/> Other: _____	

### TEST INFORMATION

Test Name	Outcome	Measured Result	Units
Blocking	NEGATIVE	Not Detectable	pmol blocked per ml
Binding	POSITIVE	0.333	OD units

### Assay Notes:

- Folate receptor (FR) blocking antibody is defined as an antibody that blocks the binding of folic acid to the folate receptor.
- The concentration of antibodies is known to fluctuate over time (and in response to changes in cow's milk intake) so repeating the test, if clinically warranted, has been recommended.

**DISCLAIMER:** These test results are not intended to diagnose any disease. These are lab derived tests that were developed and are being performed by VascularStrategies, LLC for Religen, Inc. They have not been cleared or approved by FDA. For more information about your results, please reach out to your provider who ordered this test.
