As the hub of English language learning in Montgomery County, MCAEL maintains and builds the complex system that meets many types of learner and program needs, providing a range of educational opportunities.

English language learning broadens access to education, jobs, and essential resources, furthering participation in the community and fostering equity.

MCAEL’s Mission: We strengthen and build adult English language learning programs and instruction to further individual and family success at work, school, and in the community.

MCAEL’s 2024-2026 Strategic Plan is founded in our belief that all English language learners should have easy access to high-quality, culturally responsive English language programs.
