

SpaceMax™

40" X 48" SPACE MAXIMIZING BULK CONTAINERS

SpaceMax fits 416 units in a 53' trailer, delivering 73% greater return efficiency than traditional 40x48" bulk containers. Weighing approximately 80 lbs, SpaceMax is also the lightest container in the industry, all while maintaining a 1,000 lbs capacity rating. For most applications, SpaceMax represents an opportunity to drastically reduce transportation and storage costs without sacrificing functionality.

KEY FEATURES & BENEFITS

SpaceMax functions like a bin while offering the transport and storage efficiency of a sleeve pack container.

✓ 416 Units Per Truckload

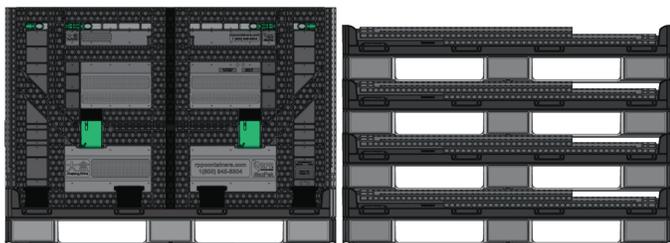

- **Benefit:** A collapsed height of 8" allows for 416 units in a 53' trailer vs. 240 units of standard 40x48" containers.
- **Why It Matters:** 73% greater return efficiency leads to significant reductions in freight and storage costs.

✓ 78 - 83 lbs. Tare Weight

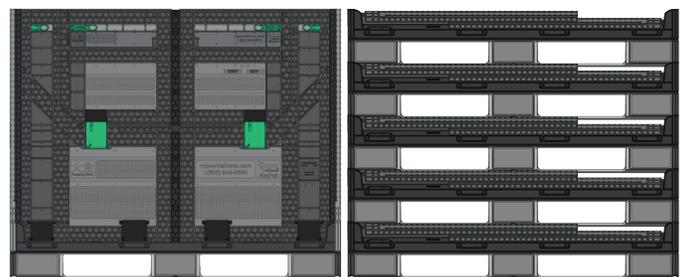

- **Benefit:** Molded with Polypropylene plastic with greater flex modulus for enhanced durability and 1,000 lb capacity.
- **Why It Matters:** With a 33% lower tare weight than the competition, you ship more of your product and less of the packaging, reducing shipping costs and improving material handling.

✓ Quick & Easy Assembly

- **Benefit:** One assembled unit, unlike sleeve packs that require (3) separate pieces.
- **Why It Matters:** SpaceMax does not require the management of bases, sleeves, and tops, eliminating the inefficiency and hassle of multi-part packaging.

34" Return Ratio: 4:1

39" Return Ratio: 5:1

FEATURES

Repairable all-plastic latches

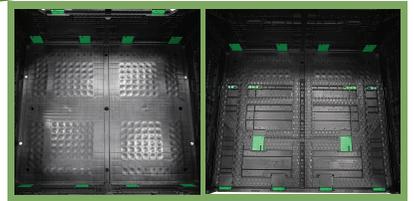

Two drop doors for easy access, available on either the 48" or 40" sidewalls

Flat door hinges allow the drop doors to lay flushed against the container

4-way forklift and pallet jack access streamlines handling

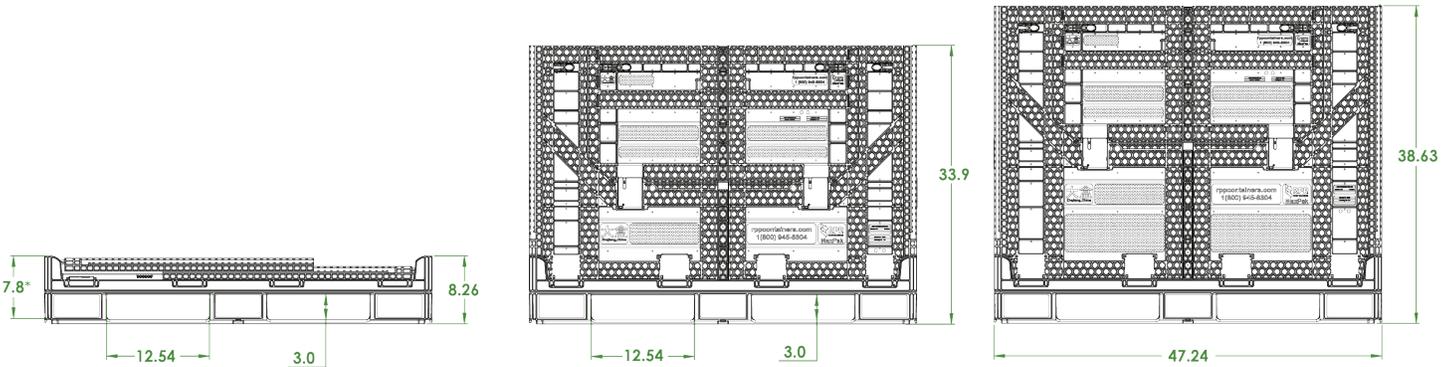

Textured areas allow for clean application and removal of adhesive labels

Recessed channel allows for minimal wasted space when the container is fully collapsed

BASE FLOOR CHANNEL | ONE WALL DOWN

ENGINEERED FOR EFFICIENCY

SpaceMax, with a collapsed height of under 8", is 40% more efficient than traditional 40x48" bulk containers. Weighing approximately 80 lbs, SpaceMax is also the lightest container in the industry while maintaining a 1,000 lbs capacity rating. For most applications, SpaceMax represents an opportunity to drastically reduce transportation and storage costs without sacrificing functionality.
