Pria Medication Dispenser

The Pria medication dispenser helps individuals take the right medicine at the right time. At the scheduled time, the Pria will sound an alarm and flash a light to alert the individual. To dispense the pills, a personal identification number or face identification is required. The Pria can hold up to 28 doses of medication. Pria requires an accompanying app loaded to a smart device such as phone or tablet and wifi to load medication. Users must keep the app up to date with medications and dosage and the Pria device sorts and dispenses accordingly. The app can also alert caregivers of missed dosages and allows for video calling from the Pria device to caregivers if an individual needs assistance. Notifications can be sent via phone call, text message or, email. Pria can also alert individuals of the time, weather, calories of food items, etc. Pria can also be set up for wellness reminders such as water intake and going outside each day.

Product Highlights

- SCHEDULED DISPENSING
- ACCOMPANYING APP
