COSENTINO®

MORE THAN SURFACES

A FAMILY COMPANY DRIVEN BY DESIGN & INNOVATION.

A family company driven by design. More than surfaces.

At Cosentino, we design the future from the surface up. Since our beginnings, rooted in the south of Spain, we've followed a path that has led us to become a global benchmark in innovative surfaces for architecture and design.

Our story is that of a family-owned and design-oriented company that has grown through hard work, vision, and a firm belief that innovation is not just a tool: it's a force that gives meaning to everything we do.

An Industrial Legacy. A Purpose-Driven Vision.

We believe in meaningful surfaces: materials that go beyond function to connect with people, respect the environment, and elevate design to a more thoughtful dimension.

With decades of experience in material transformation, we've shown that tradition and innovation not only coexist, they strengthen each other.

Our commitment to sustainability isn't a distant goal; it's a reality we live today.

Innovation is in our nature. It's in our DNA.

We don't innovate out of obligation or to follow trends. We do it because it's how we see the world. Where others see a countertop or a façade, we see a canvas to create value, beauty, and functionality.

For us, every surface is a chance to improve the experience of those who live with it and use it every day.

We continue creating new surfaces. It's what moves us.

At Cosentino, innovation isn't a strategic choice: it's part of our nature. That's why we continue to explore new materials, develop pioneering technologies, and collaborate with professionals who, like us, believe that every detail makes a difference.

It's what moves us.

INLAYERED MINERAL SURFACES

A NEW BREAKTHROUGH IN SURFACES

ĒCLOS[®]

ĒCLOS MANIFESTO

A NEW SURFACE LANDSCAPE

We know about surfaces.
Because we design them from the inside out.

We don't settle.
That's how we move forward.

We ask ourselves the hard questions.
Because the unknown is where design begins.

Nature is our source.
Limitless. Unique. Layered.

What if a surface were a portrait of nature?
What if it were made of layers?
What if we reimaged what it's made of?
What if it performed beyond the ordinary?

We've found the answer.

ĒCLOS
A New Design Landscape.

A NEW SURFACE, MATTER AND DESIGN REIMAGINED

WITH INLAYR® TECHNOLOGY

ĒCLOS is the next generation of mineral surfaces, featuring a layered 3D body integrated design and superior heat resistance.

Thanks to its INLAYR® technology, its production combines minerals and recycled materials with a low-crystalline silica composition, through an advanced process of robotic engineering and integrated decorative techniques. Eclectic Veins is our first collection, with zero crystalline silica in its composition.

The result is a high-performance material with realistic aesthetics, and a natural touch & feel, for indoor applications.

ĒCLOS FEATURES

INLAYR® 3D DESIGN TECHNOLOGY

Unlike superficial patterns, ĒCLOS's multi-dimensional approach is achieved through combining a tailored raw material composition with robotics and decoration techniques. The result is a layered 3D integration that adds depth and consistency.

REALISTIC AESTHETICS. A NATURAL TOUCH & FEEL

ĒCLOS has a natural touch and feel.
A tactile experience full of depth that feels authentic.

ENGINEERED TO PERFORM

Its advanced composition offers high resistance to impact from dropped cookware, heavy utensils, and daily collisions that occur in high-traffic workspaces.

SUPERIOR HEAT RESISTANCE

We've designed ĒCLOS to withstand temperatures up to 428 °F / 220 °C, including direct contact with cookware immediately after use. Hot cookware can be placed directly onto the surface, straight from the stove or oven, without concern for marks or damage.

A ZERO SILICA PRODUCT & A RECYCLED CORE

Eclectic Veins is our first collection, with zero crystalline silica in its composition. Made with up to 88% recycled materials and selected minerals.

FOR INDOOR APPLICATIONS

ĒCLOS is designed exclusively for indoor applications, where its aesthetics and performance are maintained in optimal conditions.

LAYERS OF DESIGN

Every ĒCLOS surface tells a story, shaped by design, depth, and emotion. With ĒCLOS, beauty is not only seen on the surface, but felt through every layer. Crafted with INLAYR® technology, it brings portraits of nature into your kitchen and interior decor.

LAYERED 3D FULL- BODY INTEGRATION

Unlike superficial patterns, ĒCLOS' multi-dimensional approach is achieved through combining a tailored raw material composition with decoration techniques.

The result is a layered 3D integration that adds depth and consistency.

TECHNOLOGY BECOMES ARTISTIC EXPRESSION

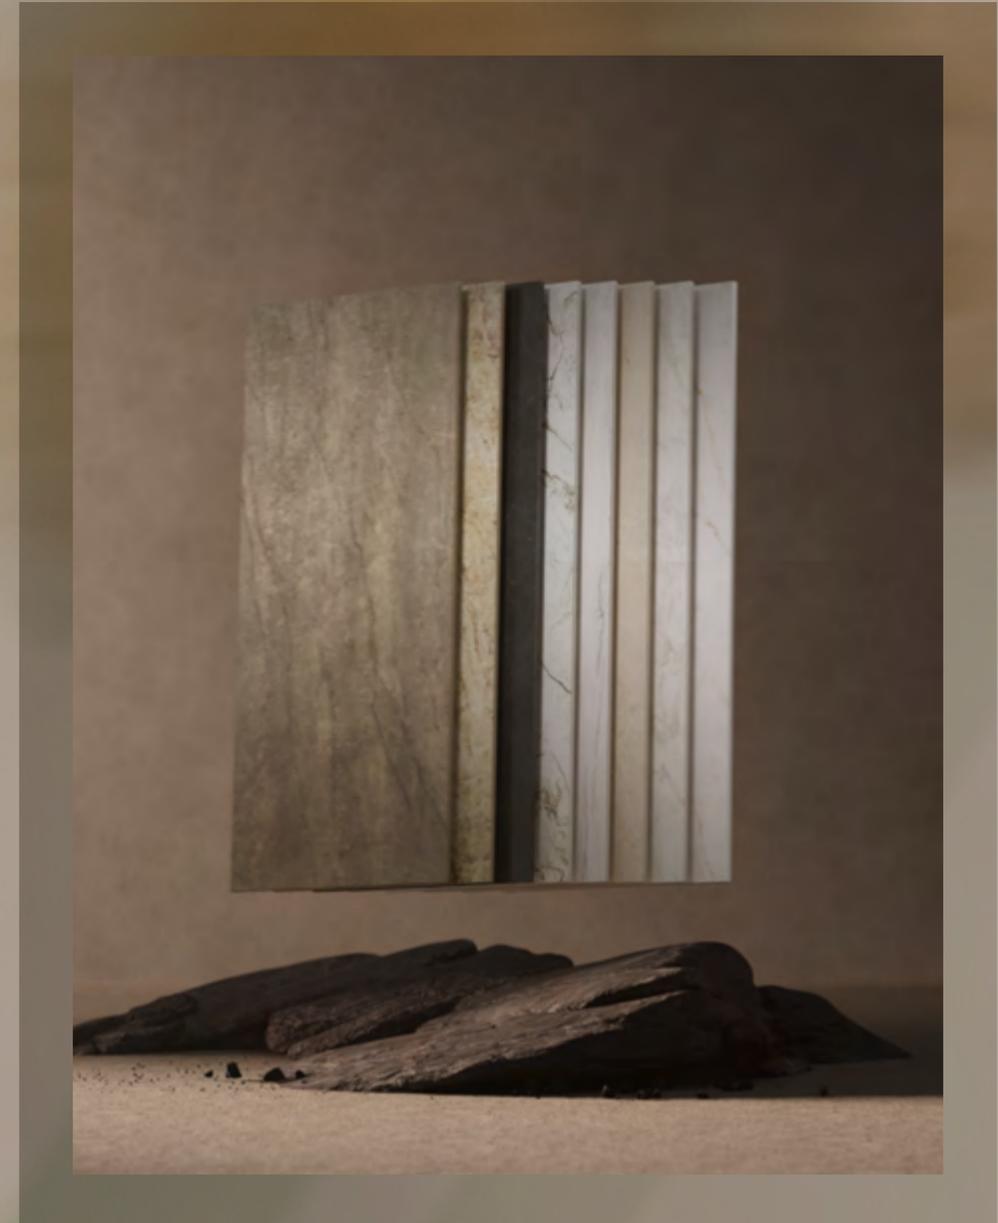

At the heart of ĒCLOS lies a new generation of design technology, enabling new ways of expression.

Using advanced INLAYR® techniques and integrated processes, each surface becomes a composition of color, texture, and light, built not in one step, but in layers, for a richer, detailed and more authentic appearance.

ECLECTIC VEINS. ECLECTIC BEAUTY

The first ĒCLOS collection conveys colors withdrawn from nature that pulse with eclectic energy and depth, ensuring every space feels alive, dynamic and unique.

ĒCLOS reveals color palettes, eclectic vein patterns, and layered textures that feel both natural and sophisticated, bringing portraits of nature into your kitchen or any space where beauty meets function.

LAYERS OF PERFORMANCE

We've developed ĒCLOS with a groundbreaking composition that delivers resistance, stability, and lasting performance in daily use. Each layer serves a purpose—whether it's protecting against impact or adapting to temperature changes—working together to enhance durability.

SUPERIOR HEAT-RESISTANCE

We've designed ĒCLOS to withstand temperatures of up to 428 °F / 220 °C, including direct contact with cookware immediately after use.

Place hot cookware directly onto the surface, straight from the stove or oven, without worrying about marks or damage. Its thermal resistance gives you confidence and flexibility in daily use.

ENGINEERED TO PERFORM

ĒCLOS delivers high-performance and durability against scratches, stains, and daily use, with easy, low-maintenance care.

Its advanced formulation offers high-resistance to the daily wear that comes with real-world living. ĒCLOS is crafted to endure through time.

IMPACT-READY. TO CREATE AN IMPACT

Its advanced composition offers high resistance to impact from dropped cookware, heavy utensils, and daily collisions that occur in high-traffic workspaces.

ĒCLOS maintains its integrity and beauty, minimizing chipping or surface damage, preserving its original strength and design through continuous use, minimizing chipping, cracking, or surface damage even in demanding conditions

LAYERS OF NEW MATTER

We are rethinking surfaces from the inside out. ÉCLOS is crafted with recycled content and Zero Silica in its Eclectic Veins collection. Designed for beauty. Made with a meaningful purpose.

ZERO SILICA. DESIGNED FROM LESS

At Cosentino, we've rethought what goes into our surfaces, and just as importantly, what doesn't.

By reducing the content of crystalline silica from our latest formulation, we keep improving the way our surfaces are made.

Eclectic Veins is the newest expression of ÉCLOS, our first collection, made with zero silica. It brings together carefully designed patterns with a more thoughtful material composition.

A MINERAL SURFACE. RECYCLED CORE WITHIN

At the heart of ÉCLOS lies a new way of designing materials with nature in mind.

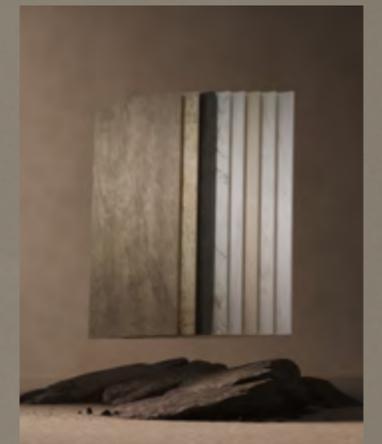

By using up to 88% recycled content in its inner core, ÉCLOS balances durability with a more responsible sourcing.

Surrounding this core, a carefully designed mineral surface brings texture, strength, and timeless beauty to life. The result is a surface made with purpose. From the inside out.

A PROCESS POWERED BY NATURE

The ÉCLOS production is powered by 100% renewable electricity, and 99% of the water used is recycled, reducing our impact while maintaining the highest standards in quality and design.

It's a meaningful step toward doing things differently: from the way we source materials to how we power the process behind them.

CONTEMPORARY DESIGN

ÈCLOS is a contemporary brand that combines design, functionality, and innovation in surfaces.

It's a brand for those who value creativity and thoughtful design.

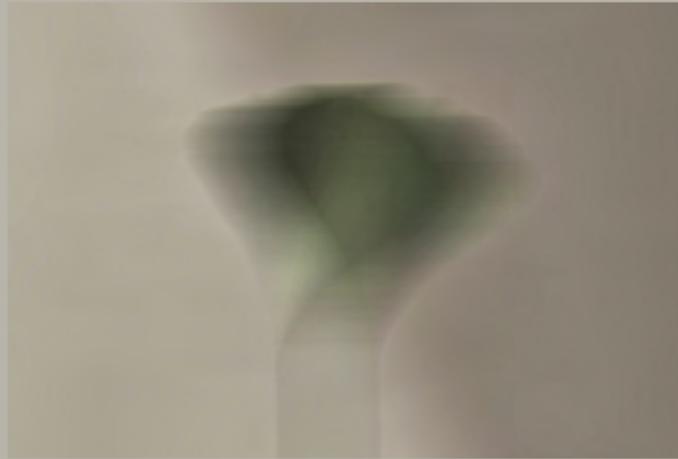

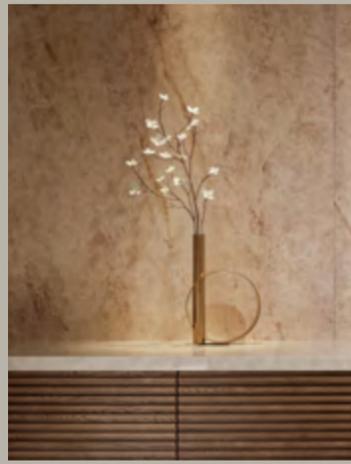

We focus on delivering original and non-ordinary surfaces that integrate art, design, and engineering, to create spaces with distinctive character.

A new generation of surfaces, designed for today's spaces and tomorrow's people.

This is ÈCLOS. A surface that creates a new design landscape that merges layers from nature with technology.

ÈCLOS®

ECLECTIC VEINS

NEW COLOR PALETTE

Imagine immersing yourself in a space where organic veins flow, intertwining through intricate patterns that emerge against dynamic, moving backgrounds.

A collection characterized by its eclectic vein design, marking the emergence of a new design that fuses the organic beauty of nature with the precision of our exclusive INLAYR® design technology, creating unique interior environments, living ecosystems of innovation.

Each color radiates eclectic energy and depth, making every space feel alive, dynamic, and unique.

ĒCLOS COLOR PALETTE

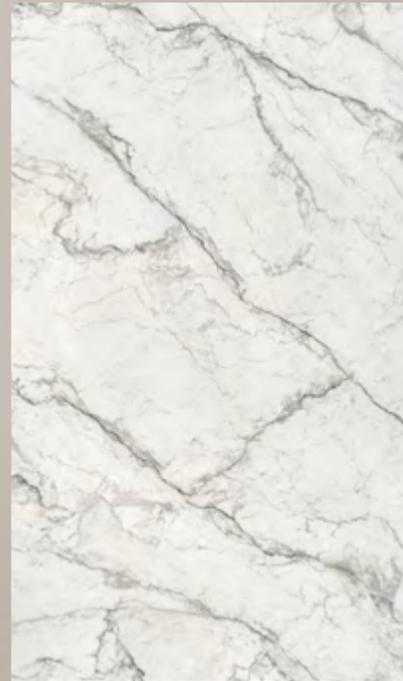

Introducing a new dimension of surfacing design, where robotic precision & layered decoration techniques meet art & engineering.

ECLECTIC VEINS

Layers of light and shadow

Layers of subtle golden veining weave light and shadow across the white background, enhancing its organic beauty and unique character. Soft, muted tones bring a calming, minimalist elegance, creating an understated luxury.

Inspiring spaces with Landr

Landr reveals its most sculptural side in this side table, defined by a round top and legs that emphasize its geometric form. Golden veins trace across the surface, catching the light and adding a timeless sense of balance. Discreet yet elegant, the piece complements rather than competes, achieving a refined, organic harmony.

The curved island forms the heart of this kitchen, where Landr's interwoven veins bring character and cohesion to the space. Fully clad in this surface, the island connects visually with the countertop and backsplash, adding depth and movement. Landr's light background reflects natural light, while its veining pairs beautifully with the surrounding neutral tones and wood cabinetry.

ECLECTIC VEINS

Gray and blue layers in striking motion

A luminous white base is traced with striking gray and blue veins in motion that flow across the surface with intention, bringing a touch of light and personality that adds a sense of wonder to countertops and interiors.

Inspiring spaces with Wondr

Classic style is reimagined through Wondr in this elegant bathroom. Subtle gray and bluish veins unfold gracefully across the shower wall, highlighted by matte black fixtures. In the background, the floating vanity and full-height mirror, also finished in Wondr, enhance the sense of light and continuity throughout the space.

In this contemporary living room, Wondr serves as a unifying thread that ties together a design inspired by nature. The main wall, clad in this surface, integrates a minimalist floor-to-ceiling fireplace and a warm wooden bookshelf. Wondr's irregular veins glide across a light base, adding movement without breaking the room's serenity. At the center, a sculptural coffee table combines a Wondr base with dark wood tops, while olive-green chairs and neutral tones complete an elegant, relaxed atmosphere.

IVORA

ECLECTIC VEINS

Natural geometry on a cream canvas

A striking yet elegant color that features an interplay of thin, linear veins running throughout a subtle variation of a light cream canvas. Slightly darker gray and beige veins create an irregular & organic pattern.

Inspiring spaces with Ivora

In this bathroom, time seems to stand still, inviting calm and reflection in a nature-inspired atmosphere. Ivora doesn't seek to dominate, but to blend gracefully with the space, creating a balanced contrast. Its creamy base feels ethereal, while gray and beige veins brings subtle nuances to the countertop and vanity, where the sink rests with delicate poise.

ECLECTIC VEINS

Organic flow of feathery veins

A soft light beige canvas sets a calming tone, while delicate, feathery veins in a slightly darker shade weave through, adding gentle movement and a layer of organic depth.

Inspiring spaces with Tajnar

The airy network of Tajnar's veins takes center stage in this bathroom, highlighted by continuous wall cladding and a monolithic sink design. Its bold shapes contrast with the surface's delicacy, achieving a striking balance. A circular mirror with a golden frame adds warmth, while a slatted side cabinet introduces texture and function without disrupting the design. The result is a serene, refined, and cohesive space.

Tajnar's organic beauty transforms this kitchen into a space full of character. The central island, featuring a multi-level bar, stands as a sculptural focal point that integrates seamlessly with the rest of the design. Clean geometric lines interplay with the soft movement of the veins in this new ĒCLOS color, bringing an effortless sense of elegance and purity.

LEGND

ECLECTIC VEINS

Lightning veins through the earth

A flowing veined composition with rich, earthy layers. Muted brown tones and browns convey calm sophistication. Lightning-like veins thread through the surface, adding character to any interior space.

Inspiring spaces with Legnd

Design strength is revealed through material purity. The Legnd sink, sculpted with defined volume, conveys balance and presence. Earthy veins flow naturally across the surface, evoking mineral landscapes. A wooden slatted front adds rhythm and warmth, while chocolate-brown walls envelop the space in a sensory, grounding atmosphere.

Conceived as a landscape in itself, this kitchen is both powerful and restrained. Legnd's lightning-like veins and earthy hues sweep across every surface—from island to backsplash—creating a seamless visual flow. The island, fully clad in Legnd, stands as a sculptural centerpiece. Behind it, the countertop extends to the ceiling in an unbroken plane, letting the material become the true protagonist. The contrast between dark wood cabinetry and abundant natural light transforms the space into a deeply sensory experience.

PHANTOME

ECLECTIC VEINS

Layers of copper in dark elegance

A dark, smooth black background creates a bold and elegant look, while warm green tones appear softly under diffused light. Copper veins with metallic accents add a touch of mystery and style.

Inspiring spaces with Phantome

This bathroom shows how black, when thoughtfully used, can shape a space full of personality. Fully clad in Phantome—from walls to countertop—the room gains a tactile richness. Coppery veins and subtle green glimmers sweep across the surface, harmonizing with the furniture. The mirror reflects the play of planes wrapped in Phantome, enhancing visual continuity and depth.

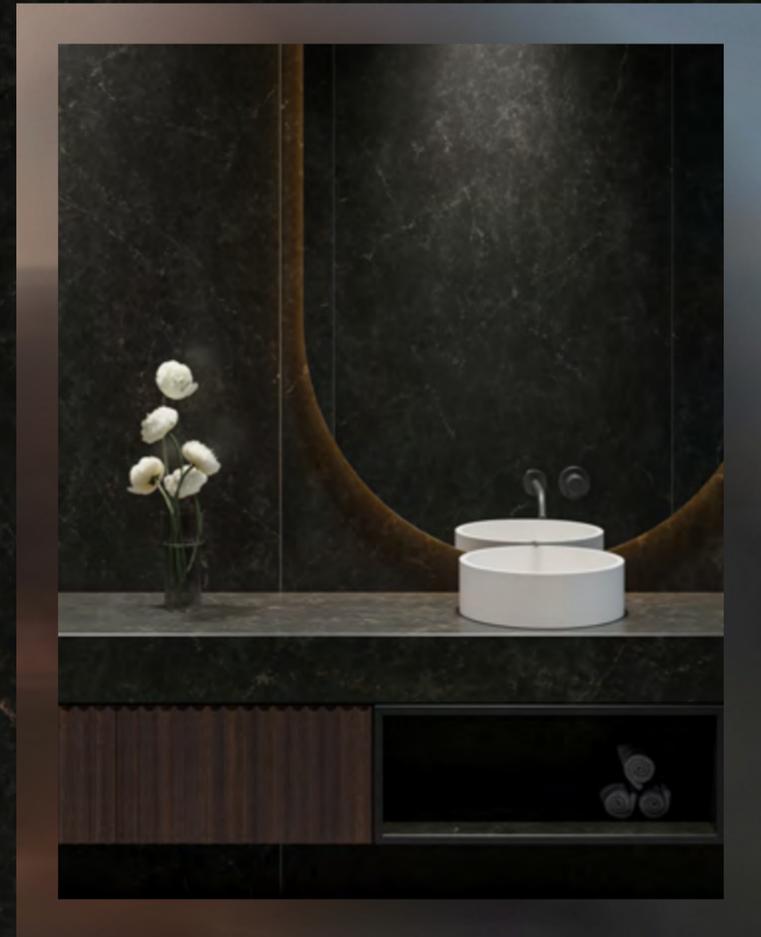

In this kitchen, the interplay of textures comes alive through the pairing of wood and Phantome's refined depth. The island, wrapped in this surface, anchors the design and connects visually with the countertop and backsplash. Integrated lighting highlights Phantome's dark tone and coppery veins, revealing new nuances with every shift of light. A small shelf in the same material extends the composition, creating visual continuity. The result is a contemporary kitchen where every element works in harmony to create balance and expressive sophistication.

ĒCLOS BY COSENTINO®

25 YEARS

ĒCLOS® is backed by a TWENTY-FIVE (25) YEAR limited warranty covering manufacturing defects.

The limited warranty includes coverage for direct contact with hot metallic cookware recently removed from the hob, provided temperatures remain within normal cooking conditions (up to 428°F / 220 °C).

However, it excludes damage resulting from outdoor use or exposure to direct sunlight. It also does not cover damage caused by contact with objects exceeding 428 °F / 220 °C or from prolonged continuous exposure to high temperatures.

Warranty validity is subject to registration within six months of purchase. Full terms and conditions in the Limited Warranty Letter available at [Cosentino.com](https://www.cosentino.com) prevail.

Please review ĒCLOS warranty policy and use & care manual for more detailed information at [Cosentino.com](https://www.cosentino.com).
