RESPECT FOR NATURE: OUR BUSINESS AND BIODIVERSITY

Dear Employees, Guests, and Stakeholders,

At Fore Resort Spa Hotel, we not only provide services to our guests but also show respect for natural resources and biodiversity. Our business emphasizes the importance we place on protected natural areas and regions with high biodiversity value by adopting an environmentally conscious approach.

1. Awareness of Protected Natural Areas:

The protected natural areas around us are important not only for their beauty but also for the support they provide to ecosystems and species survival. At Fore Resort Spa Hotel, we carry a significant responsibility toward these areas. When planning and conducting our business activities, we strive to minimize our impact on these areas.

2. The Value of Biodiversity:

Biodiversity is one of nature's most valuable assets. Every species plays a critical role in maintaining the balance and health of our ecosystems. At Fore Resort Spa Hotel, we focus on sustainable practices to preserve and support biodiversity. This means minimizing the impact of our business processes and supply chain on biodiversity.

3. Awareness and Education:

We prioritize ensuring that our employees and guests are conscious of the natural environment and biodiversity. Therefore, through training programs and awareness activities, we aim to contribute to the environmental awareness of our communities. We believe that even small efforts can lead to significant results.

4. Innovation and Sustainability:

Innovation is a powerful tool to fulfill our environmental responsibilities more effectively. At Fore Resort Spa Hotel, we continuously focus on adopting eco-friendly technologies and sustainable practices. This allows us to carry out our business activities in a way that causes less harm to the environment.

5. Community Engagement and Collaboration:

To create a broader impact on environmental protection, we will continue to collaborate with our communities. By promoting knowledge sharing regarding protected natural areas and regions with high biodiversity value, we aim to generate a stronger collective environmental impact.

At Fore Resort Spa Hotel, we remain committed to fulfilling our environmental responsibilities and safeguarding our natural surroundings, biodiversity, and future generations.

Protecting nature means protecting our own future.

Sincerely,
