***Insulated Conversion panel kits***

# TIEMAN Insulated Panel Kits

Transform Your Van into a High-Performance Refrigerated Solution

Traditional installation method

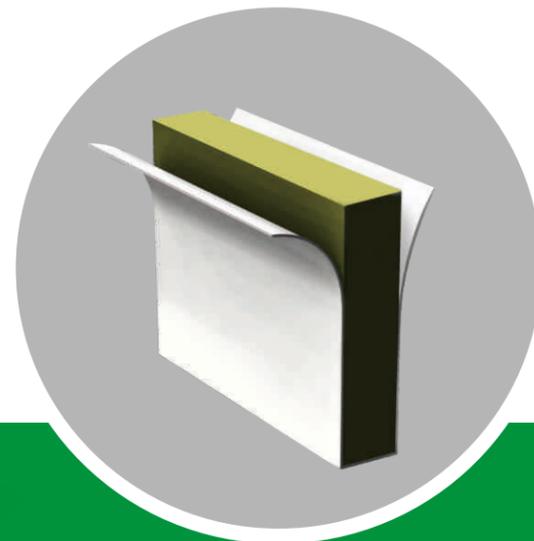

Tieman installation method

**Tieman is more convenient to install than traditional vans**

## Lightweight design, easy to install

The insulation layer of the wall panel adopts 3in PU board with a foam density of 40Kg/m<sup>3</sup> (B2 grade flame retardant), with a 0.5mm high-strength FRP board on the outer layer and a 2mm food grade high-strength FRP board on the inner layer.

## Why TIEMAN ?

TIEMAN sets the standard in insulated transport solutions, combining advanced thermal technology with precision-engineered materials to maximize efficiency.

- ◆ **Superior Thermal Control**  
Maintains consistent temperatures for refrigerated cargo.
- ◆ **Quick Installation**  
Modular design ensures seamless, hassle-free conversion.
- ◆ **Lightweight & Durable**  
Optimized for ZEV fleets, reducing weight without compromising strength.
- ◆ **Cost-Efficient – Reduces energy**  
Consumption, boosting operational savings.

## Installation Of The Evaporator
