ODYNEX AXIS LOGISTICS LLC • EXECUTIVE PARTNER & INVESTMENT BRIEF

The Albany Anchor: Turning Global Bio-Circular & Clean-Tech Demand Into Local Industrial Equity

Connecting Southwest Georgia's Industrial Backbone to Germany, Italy, Croatia, the Philippines, Nigeria & El Salvador

01. EXECUTIVE INVESTMENT THESIS

Investing in **TagTag™** and **MabhAI Nexus™** is not a passive overseas play—it is an investment in establishing **Albany, Georgia** as the North American command, engineering, and bio-circular processing headquarters for high-growth global corridors. While tightening 2026–2030 plastic recovery mandates and multi-billion-dollar clean-energy buildouts create urgent demand across emerging markets—and European logistics triangles provide industrial scale—every spatial blueprint (**OSAS-1™**), edge-AI protocol, and core IP license is anchored in Southwest Georgia.

02. THREE-CONTINENT CORRIDOR ARCHITECTURE

UPSTREAM COMMAND HUB

Albany, Georgia (USA)

North American HQ for **OSAS-1™** spatial digital twins, modular prototype engineering, IP governance, and rail-to-port industrial integration.

TRANSATLANTIC LOGISTICS GLUE

Germany, Italy & Croatia

Links Lower Franconia (**Würzburg, Kitzingen, Giebelstadt**) & **Oberhausen** rail hubs with **Italy** base corridors and **Croatia** Adriatic ports.

HIGH-GROWTH DEPLOYMENT

Philippines, Nigeria & El Salvador

Captures immediate market tailwinds: Philippines 60% EPR recovery mandate, Nigeria's $10B circular economy, and El Salvador's $2.9B clean-grid wave.

03. FOUR WAYS GLOBAL DEPLOYMENTS ANCHOR VALUE IN ALBANY

1. Local Bio-Circular & Agritech Processing

Recovered industrial polymers and organic byproducts integrate directly into Southwest Georgia's 37-county farming belt—supporting local bio-reactor hubs and soil-amendment manufacturing.

2. Recurring IP & Standards Licensing

As international sorting and micro-grid hubs scale, licensing royalties for **OSAS-1™** audits, **MabhAI Nexus™** edge-AI routing, and **CSAA™** certification flow back to Albany.

3. Shared Defense-to-Commercial DNA

Anchored alongside Marine Corps Logistics Base Albany with direct rail access to the Port of Savannah, Albany mirrors Germany's former Allied conversion hubs for modular clean-tech assembly.

4. Inbound Executive Trade Delegations

Semi-annual summits bring international founders, ESG sponsors, and diaspora investors directly into Dougherty County—driving regional joint ventures and commercial investment.

04. VENTURE PACKAGES & EXECUTIVE SUMMIT PATHWAYS

CIRCULAR RECOVERY

TagTag™: Micro-Hub Deployment

Decentralized plastic and material recovery hubs converting uncollected waste into export-grade industrial feedstock. Partners earn priority seats at semi-annual **TagTag™ Field & Trade Summits** for site diligence and municipal matchmaking.

EDGE-AI & CLEAN GRID

MabhAI Nexus™: Corridor Grid

Solar-integrated micro-processing units and AI supply-chain tracking across Manila/Cebu, Lagos, and San Salvador. Deployment tiers unlock structured **Executive Venture Summits** with direct regional joint-venture deal flow.
