

Greenbrook NeuroStar® TMS Journey

The Typical Treatment Experience

1

NO-COST CONSULTATION

You will meet with a Consult Coordinator to learn about the NeuroStar TMS treatment process, and our Care Team will start the insurance paperwork if needed.

2

PRE-ASSESSMENT

You will have an office visit with a Greenbrook-affiliated provider to evaluate whether NeuroStar TMS is right for you and to answer any additional questions you may have about the treatment.

3

MOTOR THRESHOLD

Your Greenbrook-affiliated provider will determine your prescribed dose and treatment location for NeuroStar to deliver the best possible outcomes for you.

4

TREATMENT

A total of 36, 19-minute treatment sessions* are conducted by our trained technicians. During treatment, you can watch TV, read or use your phone.

5

POST-TREATMENT OFFICE VISIT

After treatment, you will meet with your Greenbrook-affiliated provider to go over your progress, and they will make recommendations for further care.

*Your Greenbrook Provider will determine what is right for you.

We're here to support you every step of the way on your patient journey.

Greenbrook NeuroStar TMS therapy is covered by many major insurances.

We handle all aspects of your TMS treatment experience, including insurance authorizations and payment plans.

If you were referred by a provider, your Care Team can send them regular updates.

Our Care Team helps you schedule treatment at times that work best for you.

NeuroStar® TMS Therapy at Greenbrook

A Treatment Overview

What is NeuroStar TMS?

NeuroStar TMS (Transcranial Magnetic Stimulation) goes right to the source of depression – your brain. It is a non-invasive, non-drug treatment that uses focused magnetic pulses to “wake up” those areas, and help your brain work the way it should.^{1,2} It's like physical therapy for your brain.

Covered by most major insurance companies

Including Medicare and Medicaid at select locations

Zero downtime

You can resume normal activities immediately after treatment

Fits in with your existing treatment

Can be used in conjunction with medication or as a stand-alone treatment

of patients saw improvement in depression symptoms³

of patients saw symptom relief (remission)³

AVERAGE TREATMENT PLAN*

NeuroStar Adult Indications for Use

The NeuroStar Advanced Therapy System is indicated for the treatment of depressive episodes and for decreasing anxiety symptoms for those who may exhibit comorbid anxiety symptoms in adult patients suffering from Major Depressive Disorder (MDD) and who failed to achieve satisfactory improvement from previous antidepressant medication treatment in the current episode.

The NeuroStar Advanced Therapy System is intended to be used as an adjunct for the treatment of adult patients suffering from Obsessive-Compulsive Disorder (OCD).

NeuroStar Adolescent Indications for Use

NeuroStar Advanced Therapy is indicated as an adjunct for the treatment of Major Depressive Disorder (MDD) in adolescent patients (15-21).

Important Safety Information

NeuroStar Advanced Therapy is only available by prescription. A doctor can help decide if NeuroStar Advanced Therapy is right for you. Patients' results may vary.

The most common side effect is pain or discomfort at or near the treatment site. These events are transient; they occur during the TMS treatment course and do not occur for most patients after the first week of treatment. There is a rare risk of seizure associated with the use of TMS therapy (<0.1% per patient).

Visit neurostar.com for full safety and prescribing information.
