

# Cabling for Network Health and Capacity

Structured cabling can represent 80% of network efficiency and is crucial for today's data, video, and voice needs.

## Professionally Built Systems Deliver:

- Easier troubleshooting and network management
- Easier upgrades and lower network risk
- Reduced cabling bulk and congestion

Certified and experienced cabling professionals can develop a plan, source materials, and ensure that installation is to the highest industry standards. NTI offers design, staging, installation, implementation, configuration, and testing and holds leading manufacturer certifications to ensure warranties are in place and your communications systems are secure..
