### Missionpoint 2026 Medical Missions Expanding

People waiting for their medical treatments

This past month we completed our third community wide Medical Clinic, providing much needed “localized” care for those rural area families with no access to medical services. In Loyoboo, the community came together to dig a latrine, build a building for their church and cleared the land for the medical clinic to come and help the community.

Three critical surgeries were completed in March of 2026. Two children completed their second surgery and a new double cleft palate child was successfully restored by our volunteer doctors. These surgeries were all separate surgeries and very costly. **If you can help, please give today!**
