ACCENT COLOR

midnight

breton in fieldstone

Breton™

Breton **permeable pavers** provide the appearance of an old granite paver that has been in the ground for centuries. This three-piece system is crafted with a natural, stone-cleft finish.

Enlarged lugs on the units' sidewalls create quarter-inch joints that drain water to the permeable base when filled with a properly-sized aggregate. This infiltration filters stormwater and recharges groundwater sources, creating a sustainable pavement option.

Colors

fieldstone

granite

westminster in granite

Westminster™

Westminster is a traditional-looking **permeable paver** that is both visually attractive and pedestrian friendly. This system is designed to meet or exceed current stormwater management requirements. Its rectangular shape and structurally-sound herringbone pattern make it suitable for vehicular applications.

6x9x3½

Colors

fieldstone

granite

Turfstone™

A rectangular, **permeable slab** with open grids allows water to pass through the system. Turfstone can be used for overflow parking, erosion control, and parking lots requiring permeable paving. The open voids can be filled with drainage aggregate for maximum infiltration or soil to allow greenery to grow.

Colors

pewter

DISCOVER THE BENEFITS OF *Porcelain*.

ANTI-SLIP

The structure and texture of the porcelain paver surface reduces the risk of slipperiness.

NO SEALING NEEDED

No sealers are needed because Landmark Frontier20 is so dense that virtually nothing can stick to it!

RESISTANT TO ACID & CHEMICALS

Made with inert ingredients that do not react or accept acids and or chemicals, allowing you to make environmentally friendly cleaning decisions!

RESISTANT TO THERMAL SHOCK

Landmark's porcelain pavers are baked at temperatures up to 2300°F, generating a strong molecular bond and producing a very dense paver. Due to its density level, it becomes inert, allowing for extreme and sudden temperature changes within the temperature range of - 60 F +140 F.

ECO-FRIENDLY

Landmark Frontier20 porcelain pavers are produced in an environmentally-friendly facility, following the strictest state and federal regulations. Because of Landmark's environmental commitment, we can incorporate up to 20% recycled content in our USA-made porcelain pavers.

RESISTANT TO SALTS

Landmark Frontier20 porcelain pavers are completely unaffected by use of salts.

EASY TO REPLACE AND REMOVE

Landmark's Frontier20 can be easily removed and repositioned to suit your needs when not mortared or installed with adhesive.

RESISTANT TO MOLD

Landmark Frontier20 is so dense that mold and mildew are cannot develop permanently, making removal easy and straightforward.

EASY TO INSTALL

STAIN RESISTANT

Landmark's Frontier20 porcelain pavers are virtually non-porous. Due to our specific baked-on glazing process, nothing can be absorbed-- including stains.

SCRATCH & FADE RESISTANT

Landmark Frontier20 porcelain pavers are an extremely hard surface, making them virtually scratch-proof. And the baked-on graphics are created using ingredients that are completely unaffected by the sun and elements.

SAVING OVER TIME

Low maintenance costs save big dollars year after year.

EASY TO KEEP CLEAN

Mild, environmentally-friendly detergents can be used when cleaning your porcelain pavers. Pressure washers up to 1500 PSI may also be used without concern for etching or striping.

DRIVEWAYS ARE OK

When properly installed over concrete*, Landmark Frontier20 porcelain pavers are suitable for light residential vehicular traffic.

* When installed over reinforced concrete (4" minimum) using a thinset mortar suitable for porcelain paver.

FROST RESISTANT

Landmark Frontier20 porcelain pavers are so dense that frost and freezing temperatures do not affect them.

Pallet A

Pallet B

Pallet C

Corner Pallet

Colors

grand ledge in granite

Grand Ledge™

Grand Ledge retaining wall blocks provide the texture of snapped limestone with a crisp, contemporary line at a grand scale—with the benefit of engineered efficiencies to make installation easier. The blocks are 12 inches tall and come in lengths of 3, 4, 5, and 6 feet long. The unit depths help create a consistent 2¼ inch setback, and the 7½ degree taper from the face allows for subtle curves. Grand Ledge 4-sided blocks can be used for corners, top blocks, or freestanding applications, providing the perfect finishing touches for every project.

Standard Wall Units

1160 lbs/unit (approx)

Features

- 24 unique wall textures.
- Four additional 4-sided blocks can be used for corners, top blocks, & freestanding walls.
- Capable of 5-6 foot gravity walls with optimal site conditions.
- The minimum radius that can be achieved is 20 feet; however, we recommend limiting the radii of curves to no less than 30 feet for better constructability and aesthetics. These minimum values are suitable for both outside (convex) and inside (concave) curves.

heartwood in walnut

Heartwood™

When you're looking to integrate natural wood into your project, consider Rosetta Heartwood wall units. Root yourself in nature with a product that is more durable than pressure-treated lumber and hits the mark of authenticity. A more efficient and durable alternative to wood so you can build a freestanding wall, planter box, or garden wall that will last without compromising the natural woodgrain look.

dimensional flagstone in canyon

Dimensional Flagstone™

Dimensional Flagstone is the perfect choice for graceful walkways, pool decks, and elegant patios requiring consistent dimensions and a more formal, sophisticated look. All shapes are available on every pallet layer, making installation quick and easy.

TRIP-RESISTANT

There's no jagged edges or uneven seams with the consistent 2-inch (51-millimeter) thickness of Dimensional Flagstone. That means less tripping hazards for toddlers to retirees than with natural stone.

All 6 shapes on one pallet.

Colors

ash

canyon

saddle

Color swatches are for reference. Please refer to actual samples for proper color matching.

grand flagstone in ash

Grand Flagstone™

Give your patio a less rigid appearance with Grand Flagstone. Perfect for patios, pathways, pool decks, outdoor kitchens, and more. Grand Flagstone slabs maintain the attractive texture and scale of large natural flagstones but can be laid in an easy-to-install pattern.

LAYER 1

LAYER 2

LAYER 3

LAYER 4

Each layer is comprised of multiple random 1¾" thick shapes. Four different 4-piece patterns. All layers on one pallet.

Fire Pits

What better way to enjoy your outdoor living area than to gather around a beautiful fire pit with friends and family? Cool summer evenings can be savored longer with this inviting, warm retreat.

ASHLAND™ PIT

20½H x 48½ Dia

Optional steel insert
(works with or without coping)

Optional 4-piece radius coping
50 outside dia.
29½ inside dia.

STONELEDGE™ PIT

17½H x 50 Dia

Optional steel insert
(works with or without coping)

4-piece radius coping
54½ outside dia.
29½ inside dia.

YORKSHIRE™ RECTANGLE PIT

16½H x 56x44x16

Optional rectangle steel insert
35½x23½x9

YORKSHIRE™ SQUARE PIT

20½H x 44x44x16

Optional square steel insert
27¾x27¾x9¾

IMPORTANT NOTE:

Burning large items or trash in fire pits may cause damage to block units. Our fire features are designed strictly for small campfires.

NewLine Hardscapes is not responsible for any damage to the fire pit or radius coping if it is not installed with a steel insert.

GATOR NITRO SAND

Gator Nitro Joint Sand is a ready-to-use mixture of calibrated sand and resins which cure when exposed to air, hardening from top to bottom of the joint. The product can be installed in wet or dry weather, in joints ranging from a minimum 3/16" (5 mm) to a maximum 2" (50 mm) joint width. The minimum joint depth is 1" (25 mm).

- **25% More strength**
- **25% Faster setting time**

GATOR XTREME EDGE

Gator XTreme Edge is the ultimate fiber-reinforced and polymer-modified structural edge, which creates a strong and economical edging solution for any hardscape project.

Gator XTreme Edge can be used on any traditional, permeable, Gator Base, or overlay application using concrete pavers and slabs or natural and wet cast stones. Gator XTreme Edge offers permanent continuous lateral support.

Hardscape Lifetime Transferable Warranty

NewLine Hardscapes backs our manufactured paver and wall products with a lifetime transferable warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this transferable warranty with a proof of purchase (invoice or delivery ticket).

The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, NewLine disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. NewLine shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA and recognized work procedures. Please visit www.icpi.org or www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.

Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books, and online photos. However, NewLine cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. NewLine always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates a subtle blending of color.

Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powderlike deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. NewLine includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. NewLine does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence-removers. Before applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company for advice on recommendations. NewLine accepts no responsibility or liability for this occurrence.

Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. NewLine accepts no responsibility or liability for these occurrences.

Compactor and Snow Removal

NewLine pavers with textured surfaces have high and low points on the surface that give them more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the NewLine pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that also can be used for this purpose. For further information on paver details, technical information and recommended construction practices, visit ICPI at www.icpi.org.

A plate compactor should not be used on our Porcelain Tile, Veranda/Chateau XL, and Rosetta Flagstone pavers. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. NewLine will not be held responsible for damage caused by the misuse of compaction or snow removal equipment which leaves scuff marks or burns on pavers.
