

ENGINEERED SURFACE SOLUTIONS

About Us

E.S.S. specializes in mechanical and chemical surface enhancements.

Our mission is simple:

faster burr removal, better finishes, less hassle.

Our brushes, powered by proprietary ceramic fibers, remove burrs up to 0.010" while out-performing conventional media. Works on Inconel®, Titanium, Stainless, hardened steels (up to 70 HRC). Cross-hole breakthrough technology and 20–25% cost savings + faster cycle times. If your deburring results—or your vendor support—have gone dull, it's time to step up to **E.S.S.** You won't be disappointed.
