ABOUT ORPHANED STARFISH FOUNDATION

OUR MISSION

THE ORPHANED STARFISH FOUNDATION is dedicated to helping orphans, victims of abuse, survivors of trafficking, indigenous children and at-risk youth break their cycles of abuse and poverty through technology based education, job training and job placement assistance.

WE COMMIT TO EVERY PROGRAM FOR LIFE.

ABOUT THE FOUNDATION

Since our founding in 2001, **THE ORPHANED STARFISH FOUNDATION** has dedicated itself to addressing the challenges facing orphans, victims of abuse and at-risk youth by providing them with technology education. We partner with already established orphanages, schools, and community center that provide exceptional physiological and psychological needs, but lack the funds to provide their children with technology education. OSF funds the construction and operation of vocational training facilities, including funding for furnishings, purchasing required equipment, teacher salaries, job placement services and scholarships for higher education.

OSF also provides training in Robotics, Computer Programming, English Language, and Life-Skills, as well as, Arts Education Workshops, Scholarships, Internships, Micro Loans and Job Placement Assistance.

At the center, children are given an education in computer literacy with the intentions of preparing them for a better future and inspire them to uplift the community from their hazardous generational cycles.

BASIC COMPUTER TRAINING

Many of the children we serve have never touched a computer prior to working with Orphaned Starfish Foundation. Our basic computer training exists to walk them through simple technical functions such as turning on a computer, memorizing where the function buttons are located, learning how to type and use a mouse. Once those bare bone essentials are learned, they are able to move into learning the intricacies of Microsoft Word. All the children we serve graduate with the tools they need in order to be competitive candidates to gain employment and to enroll in university.

ADVANCED COMPUTER TRAINING

Once the children learn the basics, they move on to learning more sophisticated software. These trainings are catered to each center based on the needs of the area and country. They learn advanced skills in Excel, Powerpoint, Adobe Illustrator & Photoshop. They then advance to studying web design and programming/coding. Over the course of learning these programs our children are taught to problem-solve and develop critical thinking. Key lessons include learning about success within failure and not giving up at the first sign of defeat. All these lessons are vital for the students to be successful in their future employment.

COMPUTER PROGRAMMING

In programming, the students learn coding language that allows them to build software. Our youngest students are being taught programming through the BEEBOT – a child friendly robot that is a perfect tool for teaching sequencing, estimation, problem-solving. Our middle school and high school participants create computer games, geographic renderings & build 3D Printing Models.

ROBOTICS

In our robotics program, the children have the opportunity to create & build their own robots. For these projects, they use Arduino and Lego Mindstorms technology, which are not only mentally stimulating and hands-on, but fun! Some students enter contests to win prizes at the national & international levels.

ENGLISH LANGUAGE

It is reported that in several industries in the developing world, an employee's salary more than doubles with English Language. In an effort to ensure we are developing the next wave of tremendous community leaders and active role-model citizens, OSF offers English courses to several of our programs. Through language training, we look to equip out children with the best tools & resources available for them to have access to a vast array of job opportunities.

WEB DESIGN

At several of our programs, the children have developed skills advanced enough to build websites. With this training, the students will have the opportunity to work at design companies or even become entrepreneurs starting their own businesses. Knowledge of web design can open doors to future job opportunities.

LIFE-SKILLS TRAINING

Together with our partner Just Hope, OSF offers life-skills training to children ages 15 – 20. They are taught a slew of essential universal lessons from financial literacy such as how to budget, how to save money or write a check, how to interview for a job, how to rent an apartment and how to go to the doctor amongst many other lessons to successfully navigate through life as an independent, self-sufficient adult.

ARTS EDUCATION ARTEAMOR

ARTEAMOR is Orphaned Starfish Foundation's art education program. It offers job training through the arts via workshops on music production, photography, film and dance. ARTEAMOR also boosts the self-esteem of the children who have been severely abused by offering them a safe space to create and to heal through self-expression.

SCHOLARSHIP STORY

Hailemikael Tesfaye

Hailemikael Tesfaye is one of the most successful trainees at Ethiopian Children's Fund's (ECF) Technical, Vocational and Educational Training (TVET) program. Despite his difficult upbringing of having lost his father at a young age, and having to live in extreme poverty with his mother due to lack of resources, Hailemikael fought to overcome. He earned himself a scholarship to study at ECF and dove deep into the learning. Thanks to the Orphaned Starfish Foundation's technology center at ECF, he completed his Level 2 Information Technology Support Service training at ECF TVET in 2017. Shortly after, Hailemikael entered a business proposal competition for which he became the winning contestant and was granted a micro-loan to start his own business – a full service printing company that gives printing access to the community and helps prepare legal documents for clients. Today, his business is flourishing and he thanks OSF for giving him the necessary skills that led him to venture into business.

LETTER FROM OUR FOUNDER & EXECUTIVE CHAIRMAN

"To me **magic** is a tool. **Magic** is a way to make children around the world laugh & to make them feel that they have the ability to do anything in the world. There is **magic** in the world and you can make more of a difference than you can imagine."

ANDREW B STEIN

Dear Supporters of the Orphaned Starfish Foundation:

This year has been the most successful year for the Orphaned Starfish Foundation up to this point.

In 2018, we set out to continue to make a difference in the lives of vulnerable, yet deserving, children around the world and were honored to be given the opportunity to bring our service to our own backyard and work with the Native American population here in the United States. The White Earth Reservation in Minnesota welcomed us, and we were able to supply their Mahnomen Boys & Girls Club with a state-of-the-art computer center. We inaugurated that center in October, shortly before the gala and have already seen a monumental change in the youth it has reached. The White Earth Reservation in the past, and still today, suffers from generational poverty, abuse of alcohol and drugs. We are there to bridge a gap between potential and resources that will allow these teens to increase their probability of graduating high school and find gainful employment or enter the university for a brighter future.

In addition to program expansion, in October, OSF celebrated their 14th Annual Orphaned Starfish Gala this year.

We are so proud of that in 2018, we finished the year having served **13,000 children** from **60 programs** across **27 countries**.

There are never enough words to show my sincerest appreciation for your generosity and contribution, but in two simple ones: **T H A N K Y O U !**

Cheers to an even more incredible year of growth in 2019!
