

# Login to the ForeTees App on an Apple Mac Computer

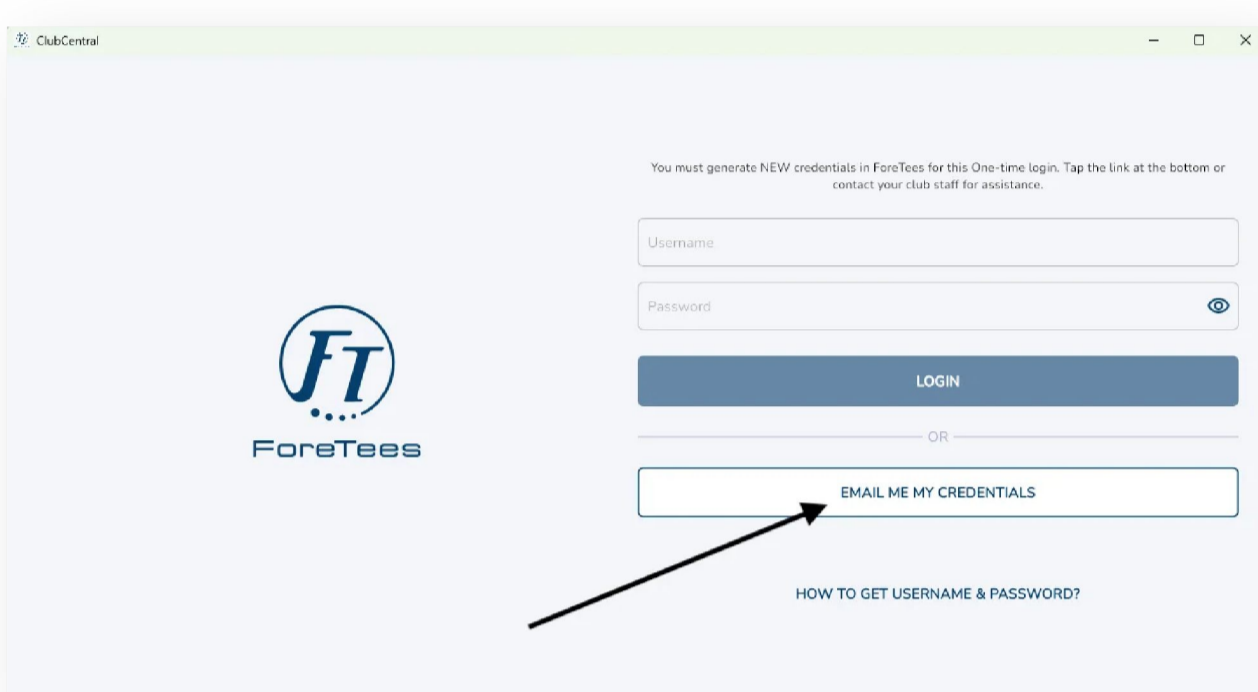

1

**View App Listing Here** - Then Click the blue **Get** button. Or you can open the App Store and search for foretees or clubcentral. You must be on OS 13 or higher and have M1 Chip or higher.

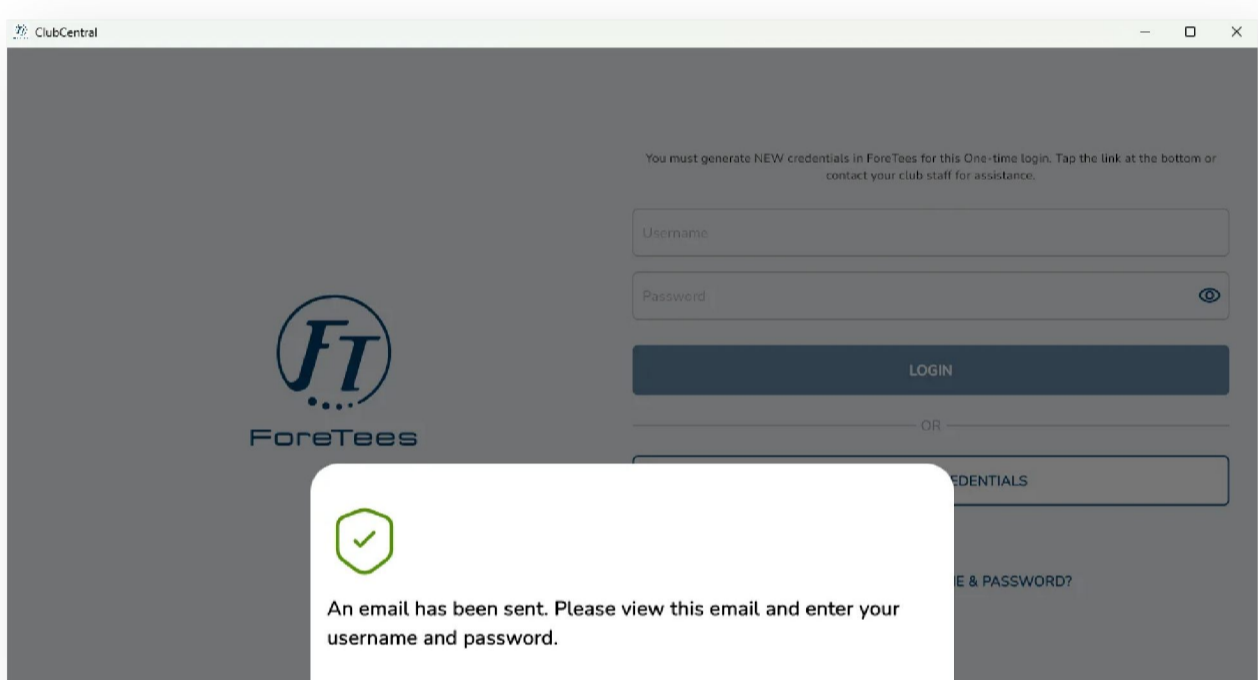

2

After the app is installed click the **OPEN** button. The app will open to the login page and receive your app credentials. Click **Email Me My Credentials** and Enter your email address that is tied to your ForeTees member account.

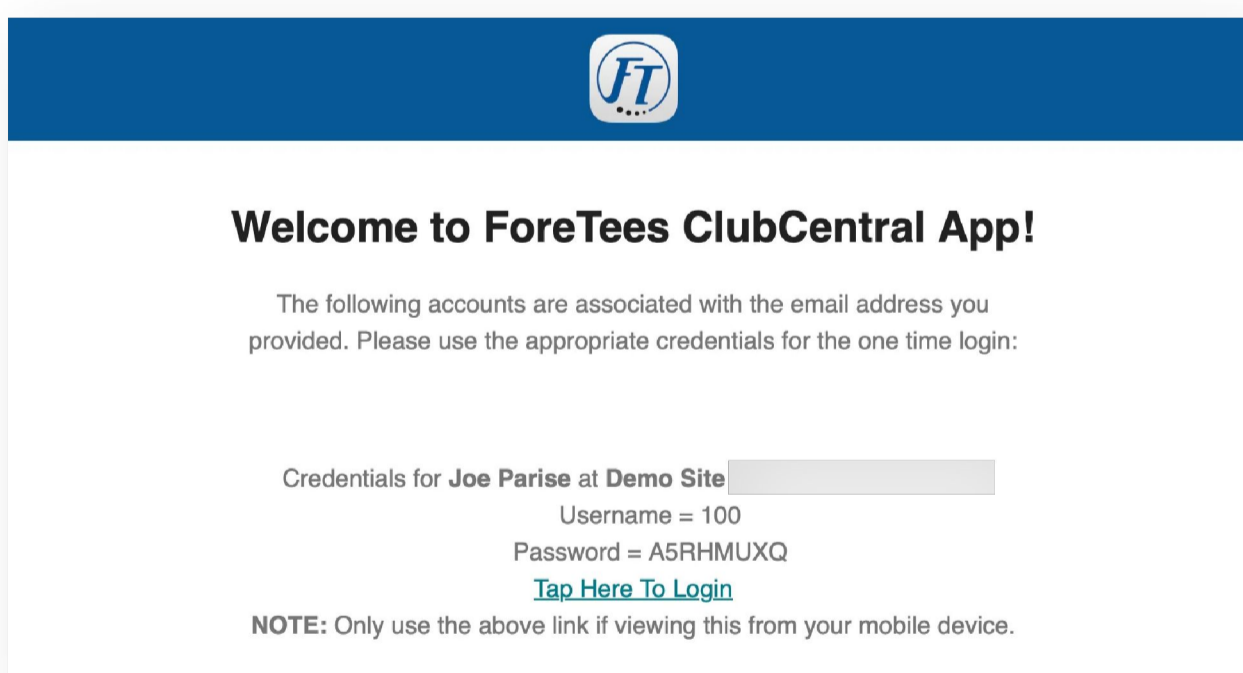

3

After entering in your email address you will see this message if we found this email in our system.

4

Open your email and you will see an email from auto-send@foretees.com with your one time login app credential. The Tap Here to Login link will only work on mobile devices so you will need to Enter or Copy/Paste that login credential into this app. Then you are all set!

Tip

Once you are logged in you will not need to login again on this Computer. Here are some steps to make it easier to find.  
1) Right Click the app icon on the bottom bar  
2) Select Options.  
3) Select Keep in Dock. This will keep it on your bottom bar dock even when app is closed
