

Bathtub Reglazing

Bathtub reglazing is our specialty. Reglazing is an excellent alternative to replacement of worn or color dated bathtubs, showers, wall tile and sinks.

With minimal disruption to your home, reglazing can save you up to 80% of replacement and the new surface will last many years with proper care.

Why replace when you can save time, money and stress by reglazing? DuraFinish's reglazing process may be the solution for your bathroom project.

Vintage Clawfoot Tub Restoration & Sales

When restoring a Victorian home or adding a beautiful touch of the past into a new home, many people love these vintage tubs. Deeper than a standard tub and made of cast iron and porcelain, water will hold heat for much longer which makes them great for soaking in.

Whether you have a tub or sink that you would like to have restored or if you are shopping for one that's ready to install, contact us today.

Handicap Access Tub Conversions

The Safeway Step is a unique and affordable solution to convert your existing bathtub for handicap access.

Allow safer and easier access to your tub for both you and your caregiver. Installation of the Safeway Step is completed in a matter of just a few hours without the inconvenience or high cost of major remodeling.

Visit our website for more details on our reglazing or Safeway Step processes.
