

CASE STUDY

Global Beverage Manufacturer

CHALLENGE

Client was let down by their long-term Engineering talent provider who could not source the skillsets required for their critical European projects.

The client faced several critical challenges that required immediate and expert intervention:

- **Factory Feasibility & Expansion:** Assessing the viability of new factory sites and managing large-scale expansion projects to support business growth.
- **Technical & Quality Troubleshooting:** Addressing production inefficiencies and ensuring compliance with stringent industry regulations.
- **Utilities Management:** Resolving technical issues related to utilities, ensuring optimised performance and sustainability.
- **Factory Decommissioning & Closure:** Managing the safe and efficient closure of a site in Europe, including asset relocation and regulatory compliance.

The Solution

Solution: With just a 30 minute briefing call and blocked out interview slots in the diary for 48 hours time, we delved into our European talent pool of pre-referenced and immediately available Project Leaders to deliver the above.

CASE STUDY

Global Beverage Manufacturer

Throughout these projects, we also supplied the following contract professionals to ensure successful execution:

- **Project Managers** - Overseeing the full lifecycle of factory expansions, troubleshooting, and decommissioning.
- **Process Engineers** - Enhancing production processes for improved efficiency and quality compliance.
- **Utilities Engineers** - Managing power, water, and waste systems to optimise operational sustainability.
- **Maintenance & Reliability Engineers** - Preventing downtime and improving equipment performance.
- **Automation & Controls Engineers** - Implementing advanced control systems for increased production efficiency.
- **Regulatory Compliance Consultants** - Ensuring adherence to local and international food manufacturing laws.
- **Health & Safety Consultants** - Managing risk assessments and safety procedures to ensure a secure working environment.
- **Environmental & Sustainability Experts** - Supporting energy efficiency and waste reduction initiatives.

Results & Impact:

Successful Expansion Projects:

Supporting the development of state-of-the-art production facilities, enabling increased capacity and efficiency.

Optimised Utilities Management:

Ensuring cost-effective and sustainable utility solutions that align with industry best practices.

Enhanced Operational Performance:

Resolving critical quality and technical issues, leading to improved product consistency and compliance.

Efficient Factory Closures:

Managing site decommissioning with minimal disruption, safeguarding the client's reputation and compliance with local regulations.
