

**TERRAMAR®** is a proprietary bio-extraction of seaweed and leonardite, designed to increase nutrient uptake and chelation. By delivering unique metabolic compounds, TERRAMAR enhances microbial activity in the rhizosphere and improves plant response to stressful conditions.

### **FEATURES**

- Bio-extraction process creates more bio-available compounds for increased activity in the plant
- Homogenous and flowable for easy handling
- Compatible with most crop inputs including insecticides, herbicides and fungicides for maximum application flexibility

### **KEY BENEFITS**

- Improves nutrient use efficiency of applied fertilizer and existing soil fertility
- Helps to improve crop tolerance to abiotic stressors such as heat, drought, salt and cold, which can represent significant yield-limiting factors
- Flexible formulation allows for applications throughout the season to address crop needs

### **RATES**

0.946L/A to 3.785L/A

Refer to label for crops

#### **| TERRAMAR® on Canola**

Vauxhall, AB (2025) - TERRAMAR foliar-applied at 0.946 L/A at fungicide timing

Treated with TERRAMAR

Untreated
