

# NAPRO

## HERBICIDE

### Quality Herbicide at a Sharp Price Point

NAPRO is a selective surface-applied or incorporated herbicide for use in certain types of newly planted or established crops. NAPRO does not control established weeds. All weed growth and crop stubble in the fields must be thoroughly worked into the soil prior to planting.

ACTIVE INGREDIENT: Napropamide .....240 g/L

### Registered Crops:

- Newly planted or established strawberries
- Established grapes
- Newly planted or established caneberries (blackberries, raspberries, boysenberries and loganberries)
- Highbush blueberries
- Cultivated lowbush blueberries
- Cranberries
- Asparagus
- Cole Crops
- Tomatoes
- Peppers
- Garlic
- Pumpkins and Squash
- Nursery and Container stock

### Packaging:

- 2 x 10L jugs

### Application Information:

- 4.69L/ha - 18.75L/ha depending on crop and application method

### Weeds Controlled:

#### Annual Grasses

- Annual bluegrass (*Poa annua*)
- Barnyard grass (*Echinochloa crusgalli*)
