Angelic Reiki

Angelic Reiki is a healing system that allows very high vibrational energies (angels or 'beings of light') to work to release physical, emotional, ancestral and karmic imbalances. It can help enhance and balance all parts of your life. The healing comes straight from the angelic realm using the healer as a channel. Everyone experiences something different during and following a treatment. This could include heat sensations, tingling, vivid colour patterns or messages from spirit. You may feel energised, you may fall asleep. All experiences are unique and there is no right or wrong one. You may not feel anything during the treatment itself but the energy will always be received in the way it is meant to and will continue to work in the days and weeks following. Angelic Reiki can be performed in-person or via distance to people and animals across the globe.
