C-LEVEL ADVISORY SERVICES

Introduction

Every organisation regardless of industry or sector, whether in the public or private sector, depends on its C-level leadership to set strategic direction, make high-impact decisions, and deliver measurable outcomes.

Executives such as the CEO, CFO, CIO, CSO, CISO and COO carry responsibility across every dimension of business performance: organisation, people, technology, process, services, operations, efficiency, third-party supplier management, legal compliance, procurement, and commercial arrangements.

However, the complex realities of modern enterprise often demand more than in-house experience or capacity can provide. Executives face competing pressures: delivering business-as-usual performance, managing change, and responding to crises, all while driving innovation and transformation.

C-Level Advisory Services offer a dedicated, independent, and experienced partner to help navigate these challenges. Our advisory approach provides clarity, structure, and practical insight - empowering executives to make informed decisions, recover control in difficult situations, and achieve strategic objectives efficiently and confidently.

C-Level Advisory Services

Our C-Level Advisory offering provides tailored support across the full executive landscape.

We work directly with senior leaders to deliver strategic, operational and governance insight where it is needed most.

Our services include:

- **Strategic Direction & Corporate Planning:** Developing, testing, and refining organisational strategies that align with long-term goals and market realities.
- **Transformation & Change Leadership:** Structuring, governing, and steering transformation initiatives to achieve desired outcomes.
- **Programme & Portfolio Recovery:** Independent assessment and recovery planning for at-risk or in-crisis programmes.
- **Operational Efficiency & Target Operating Model Design:** Streamlining processes, structures, and systems for improved performance and value creation.
- **Supplier & Commercial Management:** Addressing underperformance, renegotiating contracts, and strengthening supplier relationships.
- **Technology & Digital Strategy:** Supporting CIOs and CTOs in aligning technology and digital investments with business strategy.
- **Leadership, Culture & Conflict Resolution:** Strengthening executive alignment, mediating internal challenges, and improving leadership collaboration.
- **Financial Governance & Control:** Supporting CFOs and finance leaders in designing robust control environments and managing insource or transformation programmes.

Our advisory engagements are built on independence, experience, and outcome orientation - ensuring every recommendation is actionable, evidence-based, and aligned to your organisation's strategic priorities.

The Challenge

C-Level executives frequently face complex situations that require external expertise - not because of lack of capability, but because of limited capacity, competing priorities, or the need for objective insight.

Consider the following scenarios:

- A strategic initiative fails to deliver its intended benefits, creating financial strain and operational disruption. Internal leaders cannot personally devote the necessary time to resolve, neither can they divert the necessary resources in order to assess and resolve the issues or failure without risking business performance elsewhere.
- A transformation programme or service delivery crisis escalates, impacting critical operations or attracting board-level (or in the case of public sector) ministerial attention. The CIO or Programme Director needs an impartial advisor to understand the problem, stabilise delivery, assess supplier performance, re-establish control and enact a recovery.

In both cases, an external C-Level advisor provides the clarity, focus, and neutrality required to restore order, rebuild confidence, and deliver recovery plans while allowing executives to maintain their focus on running the business.

How We Can Help

We have extensive experience providing C-Level Advisory Services across both public and private sectors, supporting executives in high-impact and high-complexity environments.

Examples include:

1. **DVSA (Driver and Vehicle Standards Agency):**
 - Advising the CFO on a major Finance Insource Transformation, ensuring robust governance, clear accountability, and sustainable delivery capability.
 - Supporting Programme Directors on a transformation programme in crisis, redefining governance and stabilising programme delivery.
2. **Defra (Department for Environment, Food & Rural Affairs):**
 - Advising CIOs on programmes in crisis, managing ministerial escalations, addressing third-party underperformance, and integrating IS/IT strategies to restore delivery confidence.
3. **Deutsche Bank:**
 - Advising Consulting Executives on issues with a multi-million-pound outsource to HP, strengthening delivery accountability and contract clarity.
 - Resolving a global software licence compliance challenge, establishing a Global Governance SteerCo, defining global stakeholder RACI, centralising procurement and commercial oversight, and implementing a roadmap for compliance convergence.
4. **SME Counselling Sector:**
 - Working with Managing Directors to design and implement a multi-year strategy, transitioning from organic growth to a structured, strategic model enabling sustainable business expansion.
5. **Accounting Firm:**
 - Providing Conflict Resolution and Mediation advisory between senior executives, restoring leadership collaboration and operational stability.

Across all engagements, our approach ensures executives receive objective, outcome-focused, and practical guidance — enabling faster decision-making, stronger governance, and measurable results.
